

H2O Innovation, winner of the prestigious **Water Technology Company of the Year at the 2016 Global Water Awards**, is a pioneering OEM of membrane systems. We've maintained an unparalleled reputation as a high quality membrane system fabricator, specializing in water and wastewater treatment for municipal and industrial markets.

H2O Innovation is a publicly traded company (TSV: HEO) with annual sales of over \$105 million. Our experienced staff of nearly 600 is located throughout our five offices and two manufacturing plants in the U.S. and Canada.

Our business relies on three pillars: **Water and Wastewater Projects, Specialty Products & Services** and **Operation & Maintenance** for water and wastewater treatment systems.

WATER & WASTEWATER PROJECTS

As renowned membrane process technology specialists, we provide engineered solutions specific to the project needs resulting in custom and reliable systems. In North America alone, we have installed 700+ systems, using membrane processes. We also have product and service clients in more than 40 countries.

What truly sets H2O Innovation apart is our dynamic team approach that includes experts dedicated to project management, electrical engineering, mechanical engineering, process engineering, drafting (3D) and plant commissioning. As a specialized membrane equipment supplier we can also provide contract operations for water/wastewater projects. Our computer engineering team can equip your plant with SCADA & SMART technologies.

SPECIALTY PRODUCTS & SERVICES

A complete line of specialty chemicals, consumables, specialized products for the water treatment industry as well as control & monitoring systems and services make up this division.

- **Specialty chemicals:** Our unique range of specialty cleaners and chemicals include a phosphate-free antiscalant that is offered in neat or in super concentrated (11x) formula and manufactured in California.

*Microfiltration / Ultrafiltration
Nanofiltration / Reverse Osmosis
Membrane Bioreactor
Polymeric and ceramic materials*

H2O Innovation can operate, maintain & repair water treatment, distribution equipment and associated assets for all of its clients to ensure that water quality meets regulatory requirements.

SPECIALTY PRODUCTS & SERVICES (continued)

- **Products:** We provide corrosion resistant couplings and cartridge filter housings for desalination plants in the industrial and municipal markets worldwide.
- **Software:** We offer remote monitoring technologies that help improve and optimize the system's operation, simplify the operator's day to day work load and to minimize risk to membrane and reduce operating cost.
- **Services:** Our 24/7 technical assistance program strives to maintain a trusting relationship with our clients.

OPERATION & MAINTENANCE

H2O Innovation can operate, maintain, and repair water & wastewater treatment, equipment and associated assets for all of its clients to ensure that water quality meets regulatory requirements.

We currently operate 34 utilities in 6 US states, primarily on the US Gulf coast, Southeast, Northeast and the West Coast.

HIGHLIGHTS

- Founded in 2000
- 580 employees
- Three manufacturing plants :
Ham-Nord (QC) 60 000 ft²,
Minneapolis (MN) 30 000 ft²,
Vista (CA) 20 000 ft²
- Three engineering & sales offices:
Burlington (ON), Calgary (AB), Vista (CA)
