MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE FINANCIAL SITUATION

H_2O Innovation Inc.'s (the "Corporation" or "H_2O Innovation") President & Chief Executive Officer and Vice President, Finance have signed a statement of management's responsibility regarding financial information included in this Annual Report. The statement – which can be found on page 19 – also explains the roles of the Audit Committee and the Board of Directors in respect of financial information included in the Annual Report. This Management's Discussion and Analysis ("MD&A") reviews H_2O Innovation's operating results and financial condition for the years ended June 30, 2015 and 2014. The MD&A should be read in conjunction with the consolidated financial statements for the year ended June 30, 2015 and with the accompanying notes.

Certain statements set forth in this Management's Discussion and Analysis regarding the operations and the activities of H_2O Innovation as well as other communications by the Corporation to the public that describe more generally management objectives, projections, estimates, expectations or forecasts may constitute forward-looking statements within the meaning of securities legislation. Forward-looking statements concern analysis and other information based on forecast future results and the estimate of amounts that cannot yet be determined. Forward-looking statements include the use of the words such as "anticipate", "if", "believe", "continue", "could", "estimate", "expect", "intend", "may", "plan", "potential", "predict", "project", "should" or "will" and other similar terms as well as those usually used in the future and the conditional, notably regarding certain assumptions as to the success of a venture. Those forward-looking statements involve a number of risks and uncertainties, which may result in actual and future results of the Corporation to be materially different than those indicated. Information about the risk factors to which the Corporation is exposed is provided in the Annual Information Form dated September 22, 2015 available on SEDAR (www.sedar.com). Unless required to do so pursuant to applicable securities legislation, H_2O Innovation assumes no obligation to update or revise forward-looking statements contained in this Management's Discussion and Analysis or in other communications as a result of new information, future events and other changes.

Unless otherwise indicated, all figures in the present report are expressed in Canadian dollars and come from the financial statements prepared in accordance with International Financial Reporting Standards ("IFRS").

VISION, MISSION & PROFILE

OUR VISION

To become the best in North America at providing membrane-related water treatment solutions and technologies.

OUR MISSION

To provide safe and integrated water treatment solutions and outstanding customer care in order to secure long-term relationships.

OUR PROFILE

H_2O Innovation provides integrated technological water treatment solutions based on membrane filtration technology to municipal, energy & mining end-users. H_2O Innovation designs state-of-the-art custom-built water treatment projects for the production of drinking water and industrial process water, the reclamation and reuse of water, and the treatment of wastewater. Also, directly through its affiliates, H_2O Innovation provides services and products complementary to its membrane filtration and reverse osmosis systems. These products consist of a complete line of specialty chemicals and consumables and a complete line of couplings. H_2O Innovation employs approximately 160 resources and has six locations in North America.

IMPORTANT INFORMATION

All shares, options and share purchase warrants as well as per share, option and share purchase warrant information presented in this MD&A have been adjusted, including proportionate adjustments being made to each stock option and share purchase warrant exercise price, to reflect and give effect to a consolidation, on December 1, 2014, of our issued and outstanding common shares on a five-to-one basis (the "Share Consolidation"). The Share Consolidation affected all shareholders, option holders and warrant holders uniformly and thus did not materially affect any security holder's percentage of ownership interest.

NON-IFRS FINANCIAL MEASUREMENT

In this MD&A, the Corporation's management uses measures that are not in accordance with IFRS. The measurements "Adjusted earnings before interest, taxes, depreciation and amortization (adjusted EBITDA)" and "Net debt" are not defined by IFRS and cannot be formally presented in consolidated financial statements.

The definition of adjusted EBITDA does not take into account the Corporation's gains and losses on disposal of property, plant and equipment, loss on disposal of intangible assets, finance cost – net and stock-based compensation costs. The reader can establish the link between adjusted EBITDA and net earnings (loss). The definition of adjusted EBITDA used by the Corporation may differ from those used by other companies.

Even though adjusted EBITDA is a non-IFRS measure, it is used by management, analysts, investors and other financial stakeholders to assess the Corporation's performance and management from a financial and operational standpoint.

Reconciliation of adjusted EBITDA to net earnings (loss)

Years ended June 30,	**2015**	2014
	$	$
Net earnings (loss) for the year	**272,425**	(1,456,131)
Finance costs – net	**623,238**	571,675
Income taxes	**425,848**	(302,769)
Depreciation of property, plant and equipment	**363,827**	294,059
Amortization of intangible assets	**860,332**	950,885
Loss on disposal of property, plant and equipment	**-**	5,798
Loss on disposal of intangible assets	**-**	721
Stock-based compensation costs	**2,422**	12,917
Adjusted EBITDA	**2,548,092**	77,155

The definition of Net debt consists of bank overdraft, bank loans and long-term debt less cash and cash equivalents. The reader can establish the link between net debt and debt. The definition of net debt used by the Corporation may differ from those used by other companies.

Even though Net debt is a non-IFRS measure, it is used by management, analysts, investors and other financial stakeholders to assess the Corporation's capital management.

Years ended June 30,	**2015**	2014
	$	$

[(a)] See section on "Non-IFRS Financial Measurement".

Revenues and gross profit before depreciation and amortization

Revenues for fiscal year 2015 increased by $13.9 M or 39.8% compared to the previous fiscal year. This year's growth is mainly fueled by the conversion into revenues of our project order backlog, but also combined to the organic growth of our specialty products and services. The sound business mix between projects and specialty products and services is allowing us to gain predictability in our business model, secure long-term relationship with customers and to maintain a high gross profit. The investments done to expand our sales teams are paying-off as we are currently seeing growth in all our business activities.

In fiscal year 2015 revenues from water treatment projects stood at $28.5 M compared with $17.6 M in fiscal year 2014. This increase of 61% is a direct result of the conversion of the project order backlog into revenues, which project order backlog has been refurbished during the year. During the current fiscal year the Corporation secured $26.6 M of new bookings for water treatment projects. As at June 30, 2015, the Corporation's project order backlog stands at $36.5 M compared to $38.3 M as at June 30, 2014. Over the last four quarters, the Corporation was able to maintain the pace and deliver its large backlog, showing that we can manage growth and higher volume in our water treatment projects activities. The bookings over revenues ratio of the Corporation's stood at 0.9 for fiscal year 2015, compared to 2.4 for fiscal year 2014. Investments in sales force, notably with the addition of new sales resources in United States and investments into innovative initiatives are paying off. Initiatives such as the Fiberflex™ and the SPMC™ allow the Corporation to differentiate itself from competitors and therefore secure new bookings. The FiberFlex™ design revolves around a skid that provides interchangeability and accommodates several types of modules – similar to reverse osmosis units. The FiberFlex™ provides the opportunity to take advantage of a much wider spectrum of current and future hollow fiber products. It creates value, flexibility and opportunities for Engineers, Owners and Membrane Suppliers throughout the entire project lifecycle: conceptual design, project evaluation, detailed design, operation, membrane replacement and plant expansion. The System Performance Monitoring Center (SPMC™) was developed during the current fiscal year. It combines early detection of any issues that may arise, system optimization, remote troubleshooting and accessibility of systems, and common data storage all into one, simple platform. The Corporation continues to invest into research and development and intent to launch new innovations during the next fiscal year.

The current pipeline of water treatment projects remains very rich in opportunities which should allow the Corporation to renew its project order backlog and support its revenue growth. With a dedicated sales team, we maintain strong bidding activities and business development mainly in Canada and in United States. In this regards, we have expanded our salesforce in the United States, internally and with our representatives' network, to better cover more opportunities in this expanding market. The nature of our opportunities is diversified in numerous markets and industries. The Corporation is notably capturing new bookings in California and Texas where the severe drought and population increase generate massive investments in water treatment infrastructures. The business activity in the United States is exceeding the noticeable slowdown in the Canadian energy market. On top of that, we sold, delivered and commissioned our largest UF system to date which includes the new FiberFlex™ rack design. We also secured our first SPMC™ service package for a customer in Florida.

Clifton, Colorado - UF 12 MGD Drinking Water

The following table summarizes the evolution of the Corporation's revenues and new project orders, together with the variations in its backlog over the last eight quarters. The revenues figures attest of the Corporation's vision and the efforts deployed to grow revenues from specialty products and services while increasing our project order backlog.

	2014 FY				**2015 FY**				**2015 FY**	**2014 FY**
	Q1	**Q2**	**Q3**	**Q4**	**Q1**	**Q2**	**Q3**	**Q4**		
Project Order backlog	$12.4 M	$17.3 M	$23.5 M	$38.3 M	$36.1 M	$29.6 M	$40.4 M	**$36.5 M**	**N/A**	N/A
Bookings for water treatment projects (*)	$3.4 M	$9.6 M	$10.6 M	$18.2 M	$5.1 M	$2.2 M	$16.4 M	**$2.9 M**	**$26.6 M**	$41.8 M
Revenues from water treatment projects	$5.1 M	$4.7 M	$4.4 M	$3.4 M	$7.3 M	$8.7 M	$5.6 M	**$6.9 M**	**$28.5 M**	$17.6 M

Revenues from specialty products and services (usually recurrent in nature)	$3.2 M**	$4.1 M**	$5.4 M	$4.5 M	$3.9 M	$5.0 M	$6.5 M	**$4.8 M**	**$20.2 M**	$17.2 M
Total revenues	$8.3 M	$8.8 M	$9.8 M	$7.9 M	$11.2 M	$13.7 M	$12.1 M	**$11.7 M**	**$48.7 M**	$34.8 M

(*) Bookings for water treatment projects include foreign exchange impact.
(**) Does not include Piedmont's revenues until its acquisition on December 5, 2013

On the other hand, revenues from specialty products and services reached $20.2 M compared with $17.2 M in fiscal year 2014, which represents an increase of 18% compare to last fiscal year. The increase of revenues from sales of specialty products and services is the result of our steady efforts aimed at increasing the organic growth associated with our maple syrup production equipment and products and our specialty chemical products. Our strategic decisions such as the acquisition of Piedmont Pacific Corporation Inc. in December 2013, which is now fully integrated, and the start-up during the current fiscal year of a new venture in the leasing and operating and maintenance of water treatment systems also contributed to increase our revenues. Our specialty chemical products business unit experienced a record year for sales and distributors expansion. At the end of the year, we expanded our warehouse in Vista, California, by an additional 7,500 sq.ft. allowing us to better cope with growing demand for our chemicals and our Piedmont couplings. On top of that, our service team continued to retain our customers but also worked very effectively with our commissioning specialists and project managers to earn confidence from the end-users and secured new business.

New Vista warehouse – 7 500 sq.ft.

Finally our maple business unit continued to surprise us by surpassing their sales objectives, launched successfully the H2O-Smartrek™ product line. They also lead the market for high-end membrane concentrators with the commercialization of the new Super-Concentrator™ technology. Alongside the refurbishing of our assembly facility in Ham-Nord, we also revealed our new "Maple Store" concept to serve our existing and new customers. The maple group added talented resources to their team and pursued their expansion with the addition of new distributors in Eastern Canada and North-East USA.

Maple store's new look – Ham-Nord, QC

Revenues from specialty products and services accounted for 41.6% of total revenues, while this proportion was 49.4% in the previous fiscal year. As these revenues are recurring in nature, this strategy for organic growth of revenues from sales of specialty products and services is proven to be efficient since it minimizes the impact of revenue volatility associated with revenues from water treatment projects. The SP&S division also reinforces long-term relationships with the projects customers and maintain a higher gross profit.

The Corporation's operations in fiscal year 2015 generated a fair 27.9% gross profit, compared with 26.6% in fiscal year 2014. This increase of the gross profit margin is mainly fueled by the gross profit coming from the sales of the specialty products and services. Even though the business proportion of the specialty products and services was lower this year compare to last year, the contribution on the gross profit is significant enough to generate this 4.8% increase of the profit.

Operating expenses

Showing an increase of approximately $171,000, operating expenses totaled $1 M for this current fiscal year compared to $0.9 M for the previous fiscal year. This increase is due to the integration of Piedmont which required the addition of new positions to solidify the supply chain, develop new suppliers and to ensure technical support of the delivery of Piedmont products. To a lesser extent, the increase is also due to investments done to improve our logistics and supply chain activities related to specialty chemicals.

Selling expenses

Selling expenses have increased by approximately $0.5 M and stood at $4.5 M for this current fiscal year compared with the previous fiscal year. Selling expenses are linked to bookings and revenues, but do not fluctuate proportionally. The increase is mostly due to the addition of sales related personnel, to water treatment related tradeshows and to commissions recorded in regards to sales target reached for specialty products and services.

The increase of selling expenses is in line with our business plan which objective is to expand our presence in North America in order to increase our water treatment projects' sales on the territory.

Administrative expenses

Administrative expenses increased by approximately $680,000 or 16.5% and stood at $4.8M in fiscal year 2015, most of which is non-recurring, compared with fiscal year 2014. Salaries and fringe benefits have increased following the addition of personnel to support operations during fiscal year 2015. Professional fees and listing fees have increased following the Corporation's listing on OTCQX marketplace in the United States during fiscal year 2015 compared to fiscal year 2014. In addition, the Corporation has completely written off $183,000 in regards to a receivable from a distributor of maple syrup production products following various legal actions in the last three years which resulted in the distributor's bankruptcy.

The Corporation's ratio of selling, operating and administrative expenses ("SG&A") as a whole over revenues amounted to 21.3% for fiscal year 2015, down from 25.9% of the previous fiscal year. This decrease is attributable to a higher level of revenues derived from water treatment projects sales. Management is still convinced that focused investments in SG&A expenses are a trigger to generate higher level of revenues. We aim to keep the SG&A ratio to a level of 20% through a tight monitoring of SG&A expenses and an increase in revenues.

Research and development expenses – net

Management has streamlined the research and development activities into a more structured model to ensure that the objectives included in our 2015 operating plan were met. Therefore, a new function has been identified in the Corporation's financial statements of income (loss) in fiscal year 2014 to reflect the decisions made in this plan to support further R&D activities, essential to our organic growth.

For the year ended June 30, 2015, gross research and development expenses totaled $265,821, or 0.5% of revenues compared to $312,047 or 0.9% for fiscal year 2014. For the year ended June 30, 2015, the Corporation has not recorded tax credits from the Canadian and provincial governments for eligible research and development conducted in Canada but intends to claim such tax credits for fiscal year 2015.

Adjusted EBITDA

Adjusted EBITDA for fiscal year 2015 was $2,548,092 compared to $77,155, for fiscal year 2014. For fiscal year 2015, it represents a ratio of 5% adjusted EBITDA over revenues. This significant increase in fiscal year 2015 compared to fiscal year 2014 is due to the important growth of revenues derived from water treatment projects. It demonstrates the scalability of the Corporation. Indeed, once the Corporation's fixed costs are covered, the gross profit will directly impact the EBITDA. Therefore, volume of revenues coming from project sales matters, which is fueled by the important project order backlog.

Other losses (gains) – net

Other losses (gains) – net amount to $406,630 for the year ended June 30, 2015 compared with ($29,537) for the year ended June 30, 2014 are mostly composed of a foreign exchange loss. The foreign exchange loss is mostly unrealized and was primarily a result of the impact of the weakening of Canadian dollar on the Corporation net US monetary assets and liabilities. The Corporation's main US denominated balances are comprised of cash and cash equivalent, accounts receivable, accounts payable and accrued liabilities and a portion of bank loans. The foreign exchange loss is amplified by the larger proportion of the US denominated bank loan used to support our activities.

Finance costs – net

Finance costs – net totalled $623,238 for the year ended June 30, 2015 compared with $571,675 for the previous fiscal year. These expenses relate mostly to the long-term debt. Of this amount, $34,035 represents the theoretical and non-monetary part of interest on long-term debt. The significant increase is attributable to the increase of the Corporation's long-term debt. Also, in order to mitigate its credit risk and mainly increase its bank loans usage capacity, the Corporation started to insure a part of its accounts receivable through the insurance coverage of Exportation and Development Canada ("EDC"). The Corporation has given direction to pay all insurance proceeds to the bank. The insurance premiums are recorded in finance costs.

Net earnings (loss)

The net earnings (loss) was $272,425 or $0.013 per share for fiscal year 2015 compared with ($1,456,131) or ($0.084) per share for fiscal year 2014. This improvement is attributable to the important growth of revenues derived from water treatment projects and gross profits improvement.

Commitments

The Corporation has entered into long-term lease agreements expiring between 2018 and 2024 which call for lease payments of $5,478,457 for the rental of space. The minimum annual lease payments over the next five years are $825,015 in 2016, $858,872 in 2017, $688,686 in 2018, $682,105 in 2019 and $679,085 in 2020.

Information on share capital

As at September 21, 2015, the Corporation had 20,926,551 outstanding common shares and 331,500 stock options.

FINANCIAL SITUATION

Working capital increased from $7.4 M as at June 30, 2014 (current ratio of 1.71) to $8.4 M as at June 30, 2015 (current ratio of 1.75). The increase is attributable to the $1.0 M, $0.3 M and 0.03 M $ increase in accounts receivable, accounts payable and accrued liabilities and costs incurred in excess of billings respectively, and the decrease of $0.7 M, $0.08 M and $0.2 M in inventories, billings in excess of costs incurred and current portion of long-term debt respectively.

The net debt which stood at $4.1 M as at June 30, 2015 decreased by nearly $0.1 M compared to $4.2 M as at June 30, 2014. This decrease is attributable to the reimbursement of a portion of the long-term debt, but subdued by a long-term debt contracted to support the remodeling of our Ham-Nord premises, especially our office, our maple store and showroom.

Equity stood at $26.0 M as at June 30, 2015, compared with $22.6 M as at June 30, 2014. As at June 30, 2015 the net debt equity ratio was 0.16 whereas it was 0.19 as at June 30, 2014, showing that the Corporation is not over leveraged and has improved its overall financial situation.

Year ended June 30, (in Canadian dollars, except for ratio)	**2015**	2014
	$	$
Working capital	**$8,423,583**	$7,427,618
Working capital ratio	**1.75**	1.71
Net debt[(1)]	**$4,141,826**	$4,227,613
Equity	**$26,007,486**	$22,560,883
Net debt to equity ratio	**0.16**	0.19

[(1)] Net debt comprises bank overdraft, bank loans and long-term debt, net of cash and cash equivalents.

As at June 30, 2015 accounts receivable stood at $9.9 M compared with $8.9 M as at June 30, 2014. The increase of $1.0 M is attributable to higher level of invoicing toward the end of the current fiscal year for water treatment projects. Retentions from customers under manufacturing contracts related to municipal projects executed during the fiscal year 2015 have decreased by approximately $0.2 M.

Inventories decreased by $0.7 M to $4.0 M as at June 30, 2015 from $4.7 M as at June 30, 2014. This decrease is largely attributable to the utilization, into a customer contract, of more than half of the value of a system that has been accounted for as finished goods following the cancellation of a project in June 2013. The remaining portion of that system has been transferred to Property, plant and equipment since the containers have been leased to a client during the current year.

Cambria, California – UF/RO 587 gpm

Costs incurred in excess of billings remained fairly stable at $2.1 M as at June 30, 2015 and June 30, 2014, even though it is subject to differences between project advancement and project invoicing schedules from one project to the other. The ratio of costs incurred in excess of billings over revenues from water projects is 7.4% for the current fiscal year, compared to 11.7% for the previous fiscal year. This metric is showing the scalability of our project business, as we are executing and invoicing more projects over the same period. Billings in excess of costs incurred decreased by $0.1 M to $1.4 M as at June 30, 2015, from $1.5 M as at June 30, 2014. This decrease is also attributable to differences between project advancement and project invoicing schedules.

Accounts payable and accrued liabilities increased by $0.3 M to $4.7 M as at June 30, 2015, from $4.4 M as at June 30, 2014. This is mostly due to increased volume of activities for water treatment projects which have reached, for many of them, the manufacturing stage during which equipment is being assembled and for which suppliers are involved.

The decrease in the current portion of the long-term debt is explained by the repayment of $0.5 M during the year. On October 20, 2014, the Corporation has exercised a six-month moratorium option on the repayment of principal of the loan from other entities, starting on November 1, 2014 totaling $634,757 as of September 30, 2014. This decision was taken to help support our working capital requirements related to our large backlog. During the second quarter, the Corporation has contracted a bank loan through a mortgage secured by our plant in Ham-Nord to support the remodeling of the Ham-Nord premises.

For the year ended June 30, 2015, shareholders' equity increased by $3.4 M to $26.0 M ($22.6 M as at June 30, 2014). The elements impacting the shareholders' equity in the fiscal year 2015 are the $272,425 net earnings for the year ended June 30, 2015 and the Canadian dollar's depreciation generating an unrealized exchange gain of $3.2 M resulting from the translation of foreign operations, mainly those of the U.S. subsidiaries.

CASH FLOWS

A comparison of the Corporation's cash flows for the years ended June 30, 2015 and June 30, 2014 is presented below:

Year ended June 30, (in Canadian dollars)	**2015**	2014
	$	$
Cash flows from operating activities	**2,121,544**	(2,486,316)
Cash flows from investing activities	**(1,502,540)**	(4,407,361)
Cash flows from financing activities	**225,677**	7,222,255
Effect of exchange rate changes on the balance of cash held in foreign currencies	**104,785**	8,556
Net change	**949,466**	337,134
Cash and cash equivalents – Beginning of year	**384,369**	47,235
Cash and cash equivalents – End of year	**1,333,835**	384,369

Before the change in operating working capital, operating activities generated $2,549,246 in cash for the year ended June 30, 2015, compared with $85,775 during the corresponding year ended June 30, 2014. Net cash generated by operating activities amounted to $2,121,544 in fiscal year 2015 compared to ($2,486,316) of net cash used by operating activities during the previous fiscal year. This improvement is attributable to the significant net earnings in fiscal year 2015 compared to a net loss in fiscal year 2014 but also to a positive change in working capital items, such as:

- Higher volume of activities toward year-end reflected in an increase of the level of accounts payable and accrued liabilities in fiscal year 2015 compared to fiscal year 2014;
- A timing difference within the projects production phases affecting the invoicing milestones reached and therefore affecting costs incurred in excess of billings and billings in excess of costs incurred.

For fiscal year 2015, investing activities used net cash of ($1,502,540), mainly attributable to the acquisition of property, plant and equipment, namely the remodeling of the office and maple store at our Ham-Nord plant and various items for $595,722 and to the acquisition of intangible assets, namely the development of a scaling prediction software, ProdoseXTR™, for our specialty chemicals and investment in a new enterprise resources planning (ERP) software, and various other software in the amount of $511,429.

Financing activities generated net cash of $225,677 in fiscal year 2015 compared with $7,222,255 of net cash generated during the corresponding fiscal year. The Corporation reimbursed $521,423, contracted $460,000 of long-term debt and increased its bank loans by $876,303. Interest paid during fiscal year 2015 amounted to $589,203.

Fourth quarter (unaudited)

	Fourth quarter ended June 30	
	2015	2014
	$	$
Revenues	**11,670,028**	7,896,401
Cost of goods sold	**8,202,260**	5,778,907
Gross profit before depreciation and amortization	**3,467,768**	2,117,494
Gross profit before depreciation and amortization	**29.7%**	26.8%
Net loss	**(284,063)**	(269,242)
Basic and diluted loss per share	**(0.003)**	(0.002)
Adjusted EBITDA	**420,590**	(201,458)

Revenues for the fourth quarter were up by 48% to $11.7 M from $7.9 M for the same quarter of the previous fiscal year. The increase is explained by the increase of $3.4 M in revenues from water treatment projects.

For the quarter ended June 30, 2015, the gross profit before depreciation and amortization increased to reach 29.7%, from 26.8% for the same quarter of the previous fiscal year.

The fourth quarter SG&A expenses were somewhat higher than the first three quarters of fiscal year 2015. They stand at $2.9 M in this current quarter compared to $2.4 M in the fourth quarter of fiscal year 2014. The increase is mainly due to hiring to support operations, to the increase of selling expenses related to high bidding activities, which includes hiring of resources in our project sales team, and related to commissions paid for bookings secured during the quarter.

The fourth quarter's net loss is caused by the increase of the SG&A expenses explained in the previous paragraph.

CAPITAL MANAGEMENT

The Corporation's objective in managing capital is to ensure sufficient liquidity to pursue its growth while at the same time taking a prudent approach towards financial leverage and financial risk.

The Corporation's capital is composed of net debt and shareholders' equity. Net debt consists of interest-bearing debt less cash. The Corporation's primary uses of capital are to finance increases in non-cash working capital and capital expenditures for capacity expansion and integration.

The Corporation monitors its performance through different ratios such as those required under its credit facility and long-term debt arrangements.

Credit facility and long-term debt arrangements require that the Corporation meet certain financial ratios at fixed points in time. The financial ratios are, as at June 30, 2015:

- Working capital ratio, defined as current assets divided by current liabilities greater than or equal to 1.25:1.00;
- Debt-to-equity ratio, defined as total debt excluding deferred taxes divided by equity of less than or equal to 2.00:1.00; and
- Fixed charge coverage ratio, including all capital and interest payments on borrowings due and capital expenditures, as defined, greater than or equal to 1.00:1.00.

As at June 30, 2015 and 2014, the Corporation was in compliance with the ratios required under its credit facility and long-term debt arrangements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in accordance with IFRS often requires management to make estimates about and apply assumptions or subjective judgment to future events or other matters that affect the reported amounts of the Corporation's assets, liabilities, revenues, expenses and related disclosures. Assumptions, estimates and judgments are based on historical experience, expectations, current trends and other factors that management believes to be relevant at the time at which the Corporation's consolidated financial statements are prepared. Management reviews, on a regular basis, the Corporation's accounting policies, assumptions, estimates and judgments in order to ensure that the consolidated financial statements are presented fairly in accordance with IFRS.

Critical accounting estimates and judgments are those that have a significant risk of causing material adjustment and are often applied to matters or outcomes that are inherently uncertain and subject to change.

As such, management cautions that future events often vary from forecasts and expectations and that estimates routinely require adjustment.

Management considers the following areas to be those where critical accounting policies affect the significant judgments and estimates used in the preparation of the Corporation's consolidated financial statements.

Revenue recognition of manufacturing contracts

The stage of completion of any manufacturing contract is assessed by management by taking into consideration all information available at the reporting date. In this process, management applies significant judgments about percentage-of-completion, actual work performed and the estimated costs to be incurred to complete work.

Impairment of goodwill and other non-current assets

At the end of each reporting period, the Corporation assesses whether there is any indication that the goodwill and non-current assets have been impaired. If any such indication exists, the recoverable amount of the asset is determined. The recoverable amount is the higher of its fair value less costs to sell and its value in use. In the measurement of the value in use, estimates of future cash flows are discounted. The use of different assumptions could result in different fair values and therefore, in different carrying amounts for goodwill and other non-current assets. If the discount rate had increased or decreased by 1% compared to the assumption taken by the Corporation, assuming other variables remain constant the recoverable amount would have been greater or lesser by approximately $2,200,000 ($1,600,000 as at June 30, 2014) and no impairment would have been recorded. If the growth rate had increased or decreased by 1% compared to the assumption taken by the Corporation,

assuming other variables remain constant the recoverable amount would have been greater or lesser by approximately $1,600,000 ($1,800,000 as at June 30, 2014) and no impairment would have been recorded.

Income taxes measurement

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Corporation's entities' ability to utilize the underlying future tax deductions against future taxable income prior to expiry of the deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income. To the extent that management's assessment of any Corporation's entities ability to utilize future tax deductions changes, the Corporation would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

Slow moving and obsolete inventory

The value of slow moving and obsolete inventory is based on the Corporation's assessment of historical usage, estimated future demand and in some cases, the specific risks of loss on specifically identified inventory. The write-down may be reversed if the circumstances which caused it no longer exist.

Stock-based compensations and other stock-based payments

As regards to stock option granted, the Corporation uses the fair value based method of accounting. The fair value of stock options is determined using Black-Scholes pricing model, which required the use of certain assumptions, including future stock price volatility and expected life of instruments. The expected life is estimated using the contractual life of the instrument. The expected volatility is estimated using the historical volatility of the Corporation's stock over the same period as the contractual life. At the end of each reporting period, the Corporation revises its estimate of the number of equity instruments expected to vest.

CHANGES IN ACCOUNTING POLICIES

The Corporation has adopted the following revised standards along with any consequential amendments, effective July 1, 2014. These changes were made in accordance with the applicable transitional provisions.

a) *Impairment of assets*

In May 2013, IASB amended IAS 36, *Impairment of Assets*, which provides guidance on recoverable amount disclosures for non-financial assets. The amendments to IAS 36 must be applied retrospectively for annual periods beginning on or after January 1, 2014.

The adoption of these IFRS amendments did not have an impact on the Corporation's consolidated financial statements.

b) Levies

IFRIC 21, *Levies*, this interpretation of IAS 37, 'Provisions, Contingent Liabilities and Contingent Assets', applies to the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event ("obligating event"). IFRIC 21 clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014.

The adoption of this interpretation did not have an impact on the Corporation's consolidated financial statements.

ACCOUNTING STANDARDS AND AMENDMENTS ISSUED BUT NOT YET ADOPTED

Unless otherwise noted, the following revised standard and amendment are effective for annual periods beginning on or after January 1, 2014 (January 1, 2018 for IFRS 9), with earlier application permitted. The Corporation has not yet assessed the impact of these standard and amendment or determined whether it will early adopt them.

IFRS 9, *Financial Instruments*, was issued in November 2009 and addresses classification and measurement of financial assets. It replaces the multiple category and measurement models in IAS 39, *Financial Instruments: Recognition and Measurement*, for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through the statement of income (loss). IFRS 9 also replaces the models

for measuring equity instruments. Such instruments are either recognized at fair value through the statement of income (loss) or at fair value through other comprehensive income. Where equity instruments are measured at fair value through other comprehensive income, dividends are recognized in the statement of income (loss) to the extent that they do not clearly represent a return of investment; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely.

Requirements for financial liabilities were added to IFRS 9 in October 2010 and they largely carried forward existing requirements in IAS 39, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss are generally recorded in other comprehensive income.

In May 2014, the IASB released IFRS 15, *Revenue from Contracts with Customers*, which establishes principles for reporting the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. It provides a single model in order to depict the transfer of promised goods or services to customers. The core principle of IFRS 15 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods and services. IFRS 15 also requires more comprehensive disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers.

IFRS 15 supersedes IAS 11, *Construction Contracts*, IAS 18, *Revenue*, and a number of revenue-related interpretations (IFRIC 13, *Customer Loyalty Programs*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfers of Assets from Customers*, and SIC-31, *Revenue, Barter Transactions Involving Advertising Service*). IFRS 15 is effective for annual periods beginning on or after January 1, 2017, with earlier adoption permitted. The Corporation has not yet assessed the impact of the adoption of this standard on its consolidated financial statements.

OFF-BALANCE SHEET ARRANGEMENTS

As at June 30, 2015, the Corporation had off-balance sheet arrangements consisting of letters of credit amounting to $1.1 M; which expire at various dates through fiscal year 2017. In these letters of credit, $1.1 M is secured by deposit certificates.

FINANCIAL RISK MANAGEMENT AND FINANCIAL RISKS

The Corporation's activities expose it to a variety of financial risks: market risks (including currency risk, cash flow interest risk and fair value interest risk), credit risk and liquidity risk. The Corporation's overall financial risk management program focuses on mitigating unpredictable financial market risks and their potential adverse effects on the Corporation's financial performance.

The Corporation's financial risk management is generally carried out by the corporate team, based on policies approved by the Board of Directors. The identification and evaluation of the financial risks are the responsibility of the corporate team.

Overview

The Corporation's financial instruments and the nature of risks which they may be subject to are set out in the following table:

	Risks			
	Market risks			
Financial instrument	**Currency**	**Interest rate**	**Credit**	**Liquidity**
Cash and cash equivalents	X	X	X	
Guaranteed deposit certificates	X	X	X	
Accounts receivable	X		X	
Other assets	X		X	
Bank overdraft	X	X		X
Bank loans	X	X		X
Accounts payable and other accrued liabilities	X			X
Long-term debt	X	X		X

Currency risk

The Corporation is exposed to exchange risk as a result of its U.S. dollar purchases and sales and also as a result of its foreign subsidiary net assets. To limit the impact of fluctuations of the Canadian dollar over the U.S. dollar, the Corporation matches, in general and when possible, the cash receipts in a foreign currency with the cash disbursements in the same foreign currency. The Corporation does not use derivative financial instruments to cover the variability of cash flows in foreign currencies.

As at June 30, 2015, if the Canadian dollar had increased or decreased by five percent (5%) compared to the U.S. dollar, assuming that all other variables remained constant, net earnings for the year ended June 30, 2015 would have been greater or lesser by approximately $157,112 ($82,156 as at June 30, 2014).

The financial assets and liabilities denominated in U.S. dollars included in the Canadian corporation are as follows:

	June 30, 2015	June 30, 2014
	$	$
FINANCIAL ASSETS		
Cash and cash equivalents	**178,131**	23,495
Guaranteed deposit certificates	**19,379**	16,539
Accounts receivable	**91,018**	959,422
	288,528	999,456
FINANCIAL LIABILITIES		
Bank overdraft	**(26,829)**	(65,041)
Bank loans	**(3,279,822)**	(2,055,774)
Accounts payable and accrued liabilities	**(304,125)**	(521,767)
	(3,610,776)	(2,642,582)

Cash flow and fair value interest rate risk

In the normal course of business, the Corporation is exposed to interest rate fluctuation risk as a result of the floating-rate loans, debts receivable and loans payable. The Corporation manages its interest rate fluctuation exposure by allocating its financial debt between fixed and floating-rate instruments.

The guaranteed deposit certificates and unsecured loans bear interest at fixed rates and the Corporation is, therefore, not exposed to the risk of changes in fair value resulting from interest rate fluctuations.

The bank loans bear interest at floating rates and are accounted for at amortized costs. The Corporation is, therefore, exposed to the cash flow risks resulting from interest rate fluctuations.

As at June 30, 2015 and 2014, a 25-basis-point increase or decrease in interest rates, assuming that all other variables remain constant, would not have had a significant impact on the Corporation's net earnings and comprehensive income. These changes were retained because they are considered reasonably possible according to observations and the economic situation.

Credit risk

Credit risk relates to the risk that a party to a financial instrument will not fulfil some or all of its obligations, thereby causing the Corporation to sustain a financial loss. The main risk relates to accounts receivable. To manage credit risk from accounts receivable, the Corporation reviews credit limits, monitors aging of accounts receivable and establishes an allowance for doubtful accounts based on specific customer information and general historical trends. Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable. As at June 30, 2015, the allowance for doubtful accounts was $1,270 ($547,764 as at June 30, 2014).

The carrying amount on the consolidated statement of financial position of the Corporation's financial assets exposed to credit risk represents the maximum amount exposed to credit risk.

The following table summarizes the Corporation's exposure to credit risk:

	June 30, 2015	June 30, 2014
	$	$
Cash and cash equivalents	**1,335,887**	497,752
Guaranteed deposit certificates	**1,629,803**	1,224,846
Accounts receivable, net of tax credits receivable	**9,776,265**	8,713,772
Other Assets	**60,515**	44,826

The Corporation is also exposed to credit risk due to its cash, its deposit certificates and its investment certificates. The Corporation has $2,965,690 ($1,722,598 in 2014) in cash and guaranteed deposits certificates with banking institutions that the Corporation considers at a low risk for loss.

The table below summarizes the ageing of trade accounts receivable as at:

	June 30, 2015	June 30, 2014
	$	$
Current	**5,147,732**	4,038,025
Past due 1 to 30 days	**2,021,805**	1,433,157
Past due 31 to 90 days	**288,601**	263,986
Past due more than 90 days	**889,992**	1,947,136
	8,348,130	7,682,304
Less: Allowance for doubtful accounts	**(1,270)**	(547,764)
Trade accounts receivable	**8,346,860**	7,134,540
Retentions from customers under manufacturing contracts	**1,018,469**	1,198,327
Tax credits receivable	**99,885**	194,636
Other receivables	**410,936**	380,904
	9,876,150	8,908,408

Liquidity risk

Liquidity risk is the risk that the Corporation will be unable to fulfil its obligations on a timely basis or at reasonable cost. The Corporation manages its liquidity risk by monitoring its operating requirements and using various funding sources to ensure its financial flexibility. The Corporation prepares budgets and cash forecasts to ensure that it has sufficient funds to fulfil its obligations.

For its investing activities, the Corporation will evaluate its liquidity needs when applicable and take the necessary action.

The following table presents the financial liability instalments payable when contractually due including accrued interest as at:

As at June 30, 2015	**Carrying amount**	**0 - 1 year**	**1 - 2 years**	**2 - 3 years**	**4 years and more**
	$	$	$	$	$
Bank overdraft	2,052	2,052	-	-	-
Bank loans	4,432,077	4,432,077	-	-	-
Accounts payable and accrued liabilities	4,729,427	4,729,427	-	-	-
Long-term debt	1,269,191	617,010	136,235	91,693	424,253
Total	10,432,747	9,780,566	136,235	91,693	424,253

As at June 30, 2014	Carrying amount	0 - 1 year	1 - 2 years	2 - 3 years	4 years and more
	$	$	$	$	$
Bank overdraft	113,383	113,383	-	-	-
Bank loans	3,555,774	3,555,774	-	-	-
Accounts payable	4,417,197	4,417,197	-	-	-
Long-term debt	1,203,336	849,401	327,413	24,328	2,194
Total	9,289,690	8,935,755	327,413	24,328	2,194

Fair value

The fair value of financial instruments is based on quoted market prices when an active market exists. Otherwise, it is estimated using techniques and valuation models, such as analysis of discounted cash flows for the long-term debt, for which the significant unobservable inputs used are the discount rates which reflects the Corporation's credit risk.

There was no transfer between the levels during the year.

The carrying amount and estimated fair value of financial instruments are as follows:

Financial instruments whose fair value approximates carrying value

Cash and cash equivalents, guaranteed deposit certificates, accounts receivable, other assets, bank overdraft, bank loans and accounts payable and accrued liabilities are financial instruments whose fair value approximates their carrying value due to their short-term maturity.

Long-term debt

The fair value of the long-term debt has been established by discounting the future cash flows at an interest rate to which the Corporation would currently be able to obtain for loans with similar maturity dates and terms. The fair value of the long-term debt is $1,043,584 ($1,056,208 as at June 30, 2014) was determined using Level 2.

RISK FACTORS AND UNCERTAINTIES

The following risks and uncertainties relating to the Corporation are not comprehensive; the Corporation operates in a constantly evolving sector, which can cause new risks and uncertainties to arise. The Corporation is not in position to neither predict these risks and uncertainties, nor evaluate their impact, as the case may be, on its activities, nor to evaluate to what extent may a factor, or a combination of factors, cause actual results to differ from those presented in the forward-looking statements. Therefore, the Corporation's shareholders should not unduly rely on these forward-looking statements.

Competitive environment

In the markets targeted by the Corporation, competition is based on a number of factors, especially price, technology, application know-how, financing viability, corporate image, product warranty, reliability, distribution network, and after-sale service. Some competitors of the Corporation have the benefit of relying on larger resources, notably financial, than those of the Corporation. In the past, the Corporation noticed that challenging global financial conditions contributed to reduce the number of water treatment projects and increase the competition as well as the number of companies bidding on each project. If such competitive environment persists, profit margins on projects may be lowered and it may adversely affect the Corporation's business, financial situation and results of operations.

Operating risks

Design and fabrication of water treatment projects involve a high degree of operating risks. Human error in design and fabrication can cause material damage or delays in delivery. The occurrence of any of these events could result in loss of revenues, increased costs and liability to third parties. The Corporation uses software that has improved the design, drafting, estimation and fabrication of its products to minimize human error. The Corporation also controls production quality in its plants and is protected by a general insurance coverage.

Fixed Price Contracts

The Corporation typically enters into fixed price manufacturing contracts based upon estimates of technical risks and total production costs. Such estimates, if materially inaccurate, can result in potential losses related to fulfilling the contractual obligations of the Corporation.

Capacity to secure performance guarantees

In the industry in which the Corporation evolves, it is important for the Corporation to be able to provide required performance guarantees such as bonds or insurance coverage in order to bid for and obtain certain contracts. The capacity of the Corporation to secure performance guarantees depend among other factors on its financial situation and on the collateral guarantees that the Corporation is able to provide to a bonding Corporation. The financial situation of the Corporation and its capacity to provide collateral guarantees can be affected by many different factors and there is no assurance that the Corporation will always be able to provide the required performance guarantees for any project. If required performance guarantees cannot be provided and the Corporation cannot enter into an agreement with a customer, the Corporation may not be able to execute a project for which it had all required technical skills and competitive pricing.

Management and employees

The Corporation depends on the skills and experience of its management team and other key employees. The Corporation relies heavily on its ability to attract and retain highly-skilled personnel in a competitive environment. The Corporation may be unable to recruit, retain, and motivate highly-skilled employees in order to assist the Corporation’s business, especially sales activities that are essential to the success of the Corporation. Failure to recruit and retain highly-skilled employees may adversely affect the Corporation’s business, financial condition and results of operations.

Capital investment

The business of the Corporation depends in part upon capital investment of its customers. In many cases such capital expenditures are substantial in relation to a customer operating budget. The technologies of the Corporation frequently represent a new solution to a customer’s water treatment problems, leading to a need to educate the customer about the solutions of the Corporation. As a result, a significant proportion of the Corporation’s business is made up of orders that are large in relation to total revenues and subject to a sale cycle which may exceed one year as well as to deferment and cancellation.

Current Global Financial Conditions

The Corporation offers products and services that are primarily designed for the non-residential construction market. Non-residential construction includes municipal, industrial, commercial and institutional sectors. Activity in the non-residential construction market is closely tied to overall changes in the economy. Economic growth and cycles have a direct impact on the level of construction that takes place on an annual basis. The economic recovery, which follows one of the worst economic and financial crisis, still remains fragile. The Corporation believes that the water industry has a long-term sustained growth curve. During the financial year ended June 30, 2015, investments in water treatment projects have considerably increased; but on a short term basis such growth may be uneven due to the current instability of the global markets.

In addition, the current challenging global financial conditions have been characterized by increased volatility. The difficulties met by financial institutions have contributed to a reduction in liquidity among all financial institutions and have reduced the availability of credit to those institutions and to the issuers who borrow from them. These factors may impact the ability of the Corporation to obtain equity or debt financing on terms favorable to the Corporation. As such, continued increased levels of volatility and market turmoil may impact the Corporation’s operations and adversely affect the price of the common shares of the Corporation.

Implementation of a strategic plan

The commercial strategy of the Corporation aims at leveraging its hybrid offering of projects and consumables, focusing on the development of niche sectors and concluding acquisitions or alliances with players in strategic geographical regions, strong complimentary product lines or business models. The strategic plan of the Corporation should be considered under risks perspective, expenses and difficulties frequently encountered by a developing business. The successful viability of the Corporation’s growth strategy may require capital investments larger than those previously expected and nothing warrants that the Corporation will achieve the desired growth level.

Product Liability and Other Lawsuits

The Corporation is subject to a variety of potential product liabilities claims and other lawsuits related with its operations, including liabilities and expenses associated with product defects. The Corporation maintains product liability and other insurance coverage that management of the Corporation believes is generally in accordance with the market practice in its industry, but there can be no assurance that the Corporation will always be adequately insured against all such potential liabilities.

Additional financing and dilution

The Corporation does not exclude raising additional funds by equity financing. In addition, 331,500 stock options are currently issued and outstanding[1].

The exercise of stock options, as well as any new equity financings, represents dilution factors for present and future shareholders.

Market Liquidity

Trading on the Corporation's common shares is unstable, which could in same period result in a lack of liquidity for those shares. The market price for the common shares of the Corporation could consequently be subject to wide fluctuations. Factors such as the announcement of significant contracts, technological innovations, new commercial products, patents, a change in regulations, quarterly financial results, future sales of common shares by the Corporation or current shareholders, and many other factors could have considerable repercussions on the price of the Corporation's common shares. In addition, the financial markets may experience significant price and value fluctuations that affect the market prices of equity securities of companies that sometimes are unrelated to the operating performance of these companies. Broad market fluctuations, as well as economic conditions generally may adversely affect the market price of the Corporation's common shares.

Shortage of Raw Materials

Some of the products manufactured by the Corporation require specialized raw materials. If such raw material is not available or not available under satisfactory terms and the Corporation cannot manufacture and provide its customers with the requested product, sales level and relationships of the Corporation with its customers can be negatively affected.

Development of New Products

From time to time, the Corporation develops new products of a specialized nature that have inherent risks, namely that either the product does not perform as desired or unacceptable reliability issues render the new product un-merchantable; or supplier risk that required components procured from third party vendors do not perform in an acceptable manner, thereby having an adverse impact on marketability of such new products and on the Corporation's product liability.

Acquisition and Expansion Risk

The Corporation may expand its operations, depending on certain conditions, by acquiring additional businesses, products or technologies. There can be no assurance that the Corporation will be able to identify, acquire or profitably manage additional businesses, or successfully integrate any acquired business, products, or technologies into the business without substantial expenses, delays or other operational or financial difficulties. There can be no assurance that acquired businesses, products or technologies, if any, will achieve anticipated revenues and income.

In connection with acquisitions completed by the Corporation, there may be liabilities and contingencies, which the Corporation failed to discover or was unable to quantify in its due diligence, which it conducted prior to the execution of the acquisition, and the Corporation may not be indemnified for some or all of these liabilities and contingencies. The existence of any material liabilities or contingencies could have a material adverse effect on the Corporation's business, financial condition and results of operations. Furthermore, acquisitions may involve a number of special risks including diversion of management's attention, failure to retain key personnel and unanticipated events or circumstances, some or all of which could have a material adverse effect on the Corporation's performance.

---

[1] Adjusted to reflect the December 1st, 2014 five-to-one share consolidation.

The failure of the Corporation to manage its acquisition or expansion strategy successfully could have a material adverse effect on the Corporation's results of operations and financial condition.

Technology and regulatory changes

The water treatment industry is characterized by evolving technologies, competition imposed standards and regulatory requirements which have an impact on the demand and compel the Corporation to improve its products and services. The evolution of legal, regulatory or local requirements may render obsolete some products and some water treatment processes offered by the Corporation. The acceptance of new products may also be negatively impacted by the enforcement of new governmental legislation imposing more stringent standards.

The Corporation is also subject to risks associated with the introduction of new products and applications, especially the non-acceptance on the markets, a delay in the development or a malfunction of the products.

CONTROLS AND PROCEDURES

In compliance with the Canadian Securities Administrators' National Instrument 52-109 ("NI 52-109"), the Corporation has filed certificates signed by the Chief Executive Officer ("CEO") and the Vice President, Finance ("VP, Finance") that, among other things, report on the design and effectiveness of disclosure controls and procedures and the design and effectiveness of internal controls over financial reporting.

Disclosure controls and procedures

The CEO and the VP, Finance have designed disclosure controls and procedures, or have caused them to be designed under their supervision, in order to provide reasonable assurance that:

- material information relating to the Corporation has been made known to them; and
- information required to be disclosed in the Corporation's filings is recorded, processed, summarized and reported within the time periods specified in securities legislation.

An evaluation was carried out, under the supervision of the CEO and the VP, Finance, of the effectiveness of our disclosure controls and procedures. Based on this evaluation, the CEO and the Vice President, Finance concluded that the disclosure controls and procedures are effective, using the criteria set forth by NI 52-109.

Internal controls over financial reporting

The CEO and the VP, Finance have also designed internal controls over financial reporting, or have caused them to be designed under their supervision, in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The internal controls over financial reporting are designed using the criteria set forth by the *Committee of Sponsoring Organizations of the Treadway Commission 2013* (COSO 2013) on Internal Control – Integrated Framework. The work performed during the fiscal year allows us to conclude that the internal controls over financial reporting are effective for the year ended June 30, 2015.

Changes in internal controls over financial reporting

During the year, the Corporation did not make any modifications to the internal controls over financial reporting that had or could reasonably be expected to have a significant impact on the internal controls over financial reporting.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The Consolidated Financial Statements and Management's Discussion and Analysis ("MD&A") of H_2O Innovation Inc. and all other information in this Annual Report are the responsibility of Management and have been reviewed and approved by the Board of Directors.

The Consolidated Financial Statements have been prepared by Management in accordance with International Financial Reporting Standards ("IFRS"). The MD&A has been prepared in accordance with the requirements of securities regulators. The Consolidated Financial Statements and MD&A include items that are based on best estimates and judgments of the expected effects of current events and transactions. Management has determined such items on a reasonable basis in order to ensure that the Consolidated Financial Statements and MD&A are presented fairly in all material respects. Financial information presented elsewhere in the Annual Report is consistent with that in the Consolidated Financial Statements.

H_2O Innovation's Chief Executive Officer ("CEO") and Vice President, Finance ("VP, Finance") have designed disclosure controls and procedures, or have caused them to be designed under their supervision, to provide reasonable assurance that material information relating to H_2O Innovation Inc. has been made known to them; and information required to be disclosed in H_2O Innovation Inc.'s filings is recorded, processed, summarized and reported within the time periods specified in securities legislation.

H_2O Innovation's CEO and VP, Finance have also evaluated the effectiveness of H_2O Innovation's disclosure controls and procedures as of the end of fiscal year 2015. Based on this evaluation, the CEO and the VP, Finance concluded that the disclosure controls and procedures were effective as of that date. Based on this assessment, they determined that there were no material weaknesses in internal control over financial reporting, based on material weakness' definition set forth in NI 52-109. In compliance with NI 52-109, H_2O Innovation's CEO and VP, Finance have provided a certification related to H_2O Innovation's annual disclosure to the Canadian Securities Administrators, including the Consolidated Financial Statements and MD&A.

The Board of Directors is responsible for ensuring that Management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the Consolidated Financial Statements and MD&A. The Board of Directors carries out this responsibility principally through its Audit Committee.

The Audit Committee is appointed by the Board of Directors and is comprised entirely of independent and financially literate directors. The Audit Committee meets periodically with Management, as well as with the internal and external auditors, to review the Consolidated Financial Statements, external auditors' report, MD&A, auditing matters and financial reporting issues, to discuss internal controls over the financial reporting process, and to satisfy itself that each party is properly discharging its responsibilities. In addition, the Audit Committee has the duty to review the appropriateness of the accounting policies and significant estimates and judgments underlying the Consolidated Financial Statements as presented by Management, and to review and make recommendations to the Board of Directors with respect to the fees of the external auditors. The Audit Committee reports its findings to the Board of Directors for its consideration when it approves the Consolidated Financial Statements and MD&A for issuance to shareholders.

The Consolidated Financial Statements have been audited by Deloitte LLP., the external independent auditor, in accordance with IFRS on behalf of the shareholders. The external independent auditor has full and free access to the Audit Committee to discuss their audit and related matters.

The President and Chief Executive Officer

Frédéric Dugré

The Vice President, Finance

Josée Riverin, CPA, CA

Independent auditor's report

To the Shareholders of
H_2O Innovation Inc.

We have audited the accompanying consolidated financial statements of H_2O Innovation Inc., which comprise the consolidated statements of financial position as at June 30, 2015 and June 30, 2014, and the consolidated statements of income (loss), comprehensive income (loss), changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of H_2O Innovation Inc. as at June 30, 2015 and June 30, 2014, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

These accompanying notes are an integral part of the consolidated financial statements.

1. Governing Statutes and Nature of Operations

H_2O Innovation Inc. (the "Corporation") is incorporated under the *Canada Business Corporations Act*. The Corporation provides integrated technological water treatment solutions based on membrane filtration technology to municipal, energy & mining end-users. The Corporation designs state-of-the-art custom-built water treatment projects for the production of drinking water and industrial process water, the reclamation and reuse of water, and the treatment of wastewater. Also, directly and through its affiliates, the Corporation provides services and products complementary to its membrane filtration and reverse osmosis systems. These products consist of a complete line of specialty chemicals and consumables and a complete line of couplings. At the same time and on a smaller scale, the Corporation continues its manufacturing and equipment distribution operations for the maple industry. The head office of the Corporation is located at 330 Saint-Vallier Street East, suite 340, Quebec City (Quebec), Canada.

On September 21, 2015, the Board reviewed the consolidated financial statements and authorized its publication.

2. Changes in Accounting Policies

The Corporation has adopted the following revised standards along with any consequential amendments, effective July 1, 2014. These changes were made in accordance with the applicable transitional provisions.

a) *Impairment of assets*

In May 2013, IASB amended IAS 36, *Impairment of Assets*, which provides guidance on recoverable amount disclosures for non-financial assets. The amendments to IAS 36 must be applied retrospectively for annual periods beginning on or after January 1, 2014.

The adoption of these IFRS amendments did not have an impact on the Corporation's consolidated financial statements.

b) *Levies*

IFRIC 21, *Levies*, this interpretation of IAS 37, 'Provisions, Contingent Liabilities and Contingent Assets', applies to the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event ("obligating event"). IFRIC 21 clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014.

The adoption of this interpretation did not have an impact on the Corporation's consolidated financial statements.

3. Basis of Preparation and Summary of Significant Accounting Policies

Statement of Compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). The consolidated financial statements were prepared on a going concern basis, under the historical cost convention.

Presentation currency

The Corporation's reporting currency is the Canadian dollar. The functional currency of the Canadian corporations is the Canadian dollar. The functional currency of the foreign subsidiaries located in the United States of America and in Hong Kong is the US dollar.

Principles of consolidation

The consolidated financial statements include the accounts of the Corporation, its wholly-owned subsidiaries H_2O Innovation USA Inc., H_2O Innovation USA Holding Inc., Professional Water Technologies, LLP, Piedmont Pacific Corporation, H_2O Operation & Maintenance Inc. and Piedmont Hong Kong Limited.
H_2O Operation & Maintenance Inc. and Piedmont Hong Kong Limited were created during the current fiscal year and did not generate significant revenues.

Subsidiaries
Subsidiaries are all entities over which the Corporation has control. Control exists when the Corporation has all three of the following elements: the power to direct the relevant activities of the subsidiary, exposure or rights to variable returns from its involvement with the subsidiary; and the ability to use its power over the subsidiary to affect the amount of the Corporation's returns. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Corporation controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Corporation. They are deconsolidated from the date that control ceases.

Inter-company transactions, balances and unrealized gains and losses on transactions between group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

Business combinations
Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Corporation, liabilities incurred by the Corporation to the former owners of the acquiree and the equity interests issued by the Corporation in exchange for control of the acquiree. Acquisition-related costs are generally recognized in the consolidated statement of income (loss) as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with *IAS 12 Income Taxes* and *IAS 19 Employee Benefits* respectively;
- assets (or disposal groups) that are classified as held for sale in accordance *with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations* are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in the consolidated statement of income (loss) as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis.

When the consideration transferred by the Corporation in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination.

Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with *IAS 39 Financial Instruments: recognition and measurement or IAS 37 Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognized in the consolidated statement of income (loss).

When a business combination is achieved in stages, the Corporation's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e. the date when the Corporation obtains control) and the resulting gain or loss, if any, is recognized in the consolidated statement of income (loss). Amounts

arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to the consolidated statement of income (loss) where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Corporation reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

Foreign currency translation

Monetary assets and liabilities of the Canadian corporations denominated in foreign currencies are translated at the exchange rate in effect at the statement of financial position date, whereas other assets and liabilities are translated at the exchange rate in effect at the transaction date. Revenues and expenses are translated at the average exchange rate in effect during the year, with the exception of revenues and expenses relating to non-monetary assets and liabilities, which are translated at historical rate. Exchange gains and losses are reflected in the consolidated statement of income (loss).

The assets and liabilities of the foreign subsidiaries are translated into Canadian dollar using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income (loss) and accumulated in equity under the heading of currency translation adjustment.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and are translated at the closing rate.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Corporation has an established control framework with respect to the measurement of fair values. Management has the responsibility for overseeing fair value measurements.

Management regularly reviews significant unobservable inputs and valuation adjustment. If third party information is used to measure fair values, management assesses the evidences obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Corporation uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are not based on observable market data.

The Corporation recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which that change has occurred.

Further information about the assumptions made in measuring fair values is included in the notes to the consolidated financial statements.

Financial assets and liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Corporation's financial assets comprise mainly cash and cash equivalents, guaranteed deposit certificates and accounts receivable. The Corporation's financial liabilities comprise mainly bank overdraft, bank loans, accounts payable and accrued liabilities and long-term debt.

Recognition
The Corporation recognizes a financial instrument on its consolidated statement of financial position when it becomes party to the contractual provisions of the financial instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has transferred substantially all risks and rewards of ownership.

On initial recognition, all financial assets and liabilities are measured and recognized at their fair value and their subsequent measurement depends on their classification as described below:

Classification

Cash and cash equivalents	Loans and receivables
Guaranteed deposit certificates	Loans and receivables
Accounts receivable	Loans and receivables
Bank overdraft	Other financial liabilities
Bank loans	Other financial liabilities
Accounts payable and accrued liabilities	Other financial liabilities
Long-term debt	Other financial liabilities

Measurement
Loans and receivables and other financial liabilities are initially measured at their fair value plus transaction costs. Subsequently, loans and receivables and other financial liabilities are measured at amortized cost using the effective interest method.

The Corporation has evaluated the fair values of its financial instruments based on the current interest rate environment, related market values and current pricing of financial instruments with comparable terms.

Cash and cash equivalents

Cash includes cash and demand deposits. Cash equivalents include very liquid investments convertible into a known cash amount and maturing within less than three months from the date of acquisition. The Corporation considers bank overdraft in its cash and cash equivalents.

Inventories

Inventories are valued at the lower of cost and net realizable value. Cost is determined using the first in first out method for raw materials and finished goods. Also, the Corporation is using the absorption costing method for finished goods. The absorption costing method used by the Corporation includes direct materials, labour and manufacturing overhead expenses.

Property, plant and equipment

All property, plant and equipment are shown at cost less depreciation and impairment. Cost includes expenditures that are attributable to the acquisition of the items. Depreciation on assets is calculated using the straight-line method to allocate the cost of each asset less its residual value over its estimated useful economic life. Moulds are amortized on a units of production basis over expected total production per mould. For the buildings, component depreciation accounting is also used for components that have different useful economic life, as follows:

Buildings	25-40 years
Machinery and equipment	10 years
Computer equipment	5 years
Furniture, fixtures and office equipment	10 years
Automotive equipment	5 years
Containerized units for lease	4 years
Moulds	3-5 years
Leasehold improvements	Remaining term of the lease between two and ten years

The depreciation expense is included in the consolidated statement of income (loss) as “Depreciation of property, plant and equipment”.

The estimated useful lives, residual values and depreciation method are reviewed at each financial period end, with the effect of any changes in estimate accounted for on a prospective basis.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the consolidated statement of income (loss).

Intangible assets

Intangible assets acquired are recorded at cost less subsequent amortization and impairment. They are amortized over their estimated useful lives. The amortization expense is included in the consolidated statement of income (loss) as “Amortization of intangible assets”.

The Corporation is using the following amortization methods:

Intangible assets acquired separately

- Software is amortized using the straight-line method over a period of seven (7) years.
- Software in progress is not amortized until it is completed and ready to be used.

Intangible assets acquired in business combinations

- Rights on technologies and technologies are amortized using the straight-line method over periods of seven (7) and fifteen (15) years.
- Patents and intellectual property are amortized using the straight-line method over a period of fifteen (15) years.
- Trademarks with a definite useful life are amortized using the straight-line method over a period of seven (7) years.
- Trademarks with indefinite useful life are not amortized but are subject to impairment review annually because the Corporation controls it with no contractual or legal expiration date and there is no foreseeable time limit to its useful economic life.
- Customer relations are amortized using the straight-line method over periods of five (5), ten (10) and fifteen (15) years.
- Distribution network is amortized using the straight-line method over a period of five (5) years.
- Technical drawings are amortized using the straight-line method over a period of ten (10) years.
- Customer backlog is amortized over its related sales period, approximately four (4) months.

Goodwill

Goodwill arising in a business combination is recognized as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of consideration transferred, the amount of any non-controlling interest in the acquiree, and the fair value of the acquirer’s previously held interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

If, the Corporation’s interest in the fair value of the acquiree’s identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer’s previously held equity in the acquire (if any), the excess is recognized immediately in the consolidated statement of income (loss) as a bargain purchase gain.

Goodwill is not amortized but it is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Corporation’s cash-generating units or a group of cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in a subsequent period.

The Corporation has elected to perform its annual impairment test of goodwill during the third quarter of each year.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the gain or loss on disposal.

Other assets

Other assets are mainly composed of security deposits and are recorded at amortized cost.

Impairment of property, plant and equipment and intangible assets excluding goodwill

At the end of each reporting period, the Corporation reviews the carrying amounts of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Where it is not possible to estimate the recoverable amount of an individual asset, the Corporation estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the consolidated statement of income (loss).

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in the consolidated statement of income (loss).

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

Sales of consumables
Revenue from the sale of consumables and consignment inventory is recognized when the following conditions are satisfied:

- The Corporation has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The Corporation retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the entity; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Manufacturing contracts
Manufacturing contracts are within the scope of *IAS 11 – Construction contracts*. Where the outcome of a manufacturing contract can be estimated reliably, revenue and costs are recognized by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the percentage-of-completion of the contract such as but not limited to approval of drawings, acceptance of piping and instrumentation diagrams, assembly, inspection, start-up and acceptance of the equipment which represent proportion of contract costs incurred for work performed to date relative to the estimated total contract costs. Variations in contract work and claims are included to the extent that the amount can be measured reliably and its receipt is considered probable.

Where outcome of a manufacturing contract cannot be estimated reliably, contract revenue is recognized to the extent of contract costs incurred if it is probable that it will be recoverable. Contract costs are recognized as expenses in the period in which they are incurred. When it is probable that the total contract costs will exceed the total contract revenue, the expected loss is recognized as an expense immediately.

Interest revenue
Interest revenue is recognized when it is probable that the economic benefits will flow to the Corporation and the amount of revenue can be measured reliably using the effective interest rate applicable.

Share Capital

Common shares are classified as equity. Incremental costs that are directly attributable to the issue of common shares and stock options are recognized as a deduction from equity, net of any tax effects.

Share-Based Payment

The Corporation offers a stock option plan to directors, executive officers, key employees and consultants providing services to the Corporation and accounts for these awards in accordance with IFRS 2 – Share-based Payment. Stock options granted to directors, executive officers, key employees and consultants providing services are measured at fair value (excluding the effect of non-market-based vesting conditions) at the date of grant. Details regarding determination the fair value of equity-settled share-based transactions are set out in note 19.

The fair value at the grant date of stock options is determined using the Black-Scholes pricing model and is recognized in the consolidated statement of income (loss) as a compensation expense using a graded vesting schedule over the vesting period, based on the Corporation's estimate of the number of shares that will eventually vest. At the end of each reporting period, the Corporation revises its estimate of the number of equity instruments expected to vest. The impact of the revision of original estimates, if any, is recognized in the consolidated statement of income (loss) such that the cumulative compensation expense reflects the revised estimate, with a corresponding adjustment to the Reserve – stock option.

Any consideration received by the Corporation upon the exercise of stock options is credited to share capital, and the Reserve – stock option component resulting from share-based payment is transferred to share capital upon the issuance of the shares.

Warrants

The Corporation uses the fair value method to measure the value of warrants at the grant date. Fair value is determined using the Black-Scholes option pricing model and is recorded in the Reserve – Warrants in shareholders' equity. When warrants are exercised, the corresponding Reserve - Warrants and the proceeds received by the Corporation are credited to Share capital. When warrants are expired, the corresponding Reserve – Warrants is credited to Deficit.

Research and Development Expenses and Tax Credits for a Corporation established under the Carrefour de la Nouvelle Economie ("CNE") relating to Research and Development

Research costs are expensed as incurred. However, development costs are deferred when they meet generally accepted criteria for deferral to the extent that their recovery is reasonably assured.

Tax credits to a corporation established under the CNE relating to research and development are accounted for during the year in which the costs are incurred, provided that the Corporation is reasonably certain that the credits will be received. These tax credits are presented against the research and development costs.

These tax credits must be examined by the tax authorities and it is possible that the amounts granted will differ from the amounts recorded.

The Corporation is entitled to scientific research and experimental development ("SR&ED") tax credits granted by the Canadian federal government ("Federal") and the government of the Province of Quebec ("Provincial"). Federal SR&ED tax credits are earned on qualified Canadian SR&ED expenditures at a rate of 20% and can only be used to offset Federal income taxes otherwise payable. Refundable Provincial SR&ED tax credits are generally earned on qualified salaries, subcontracting and university contract expenses incurred in the Province of Quebec, at a rate of 37.5% of eligible base amounts.

Tax credits and grants are accounted for using the cost reduction method. Accordingly, tax credits and grants are recorded as a reduction of the related expenses or capital expenditures in the period the expenses are incurred, provided that the Corporation has reasonable assurance the credits or grants will be realized.

Taxation

Income tax expense represents the sum of the current and deferred tax. Tax is recognized in the consolidated statement of income (loss), except to the extent it relates to items recognized directly in equity, in which case the related tax is recognized in equity.

Current tax
Current tax assets or current tax liabilities represent the taxation authorities' obligations or claims for prior or current periods which are not received or paid at the statement of financial position date. Current tax is based on taxable profit which differs from accounting profit. Current tax liabilities are measured using tax rates that have been enacted or substantively enacted at the statement of financial position date.

Deferred tax
Deferred tax is accounted for using a temporary difference approach and is the tax expected to be payable or recoverable on temporary differences between the carrying amount of assets and liabilities in the consolidated statement of financial position and the corresponding tax bases on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates and laws enacted or substantively enacted at the statement of financial position date.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax liabilities are recognized for taxable temporary differences arising on investments in subsidiaries and joint ventures except where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future.

Deferred tax assets are recognized to the extent it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities are not recognized on temporary differences that arise from goodwill which is not deductible for tax purposes. Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the chief executive officer who makes strategic decisions.

Segment revenue represents sales by each segment. This is the measure reported to the chief operating decision-maker for the purpose of resource allocation and assessment of segment performance.

Net earnings (loss) per share

Basic net earnings (loss) per common share are computed by dividing the net earnings (loss) available to common shareholders by the weighted average number of common shares outstanding during the year. Diluted earnings per share are calculated giving effect to the potential dilution that could occur if the stock options and warrants to issue common shares were exercised or converted into common shares at the later of the beginning of the year or the issuance date. The treasury stock method is used to determine the dilutive effect of stock options and warrants.

Provisions

Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that the Corporation will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Warranties

Provisions for the expected cost of warranty obligations are recognized at the date of the sale of relevant products, at the management's best estimate of the expenditure required to settle the Corporation's obligation.

The provision for warranty claims represents the present value of the management's best estimate of the future outflow of economic benefits that will be required under the Corporation's obligations for warranties. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.

The Corporation offers warranties that are of variable lengths of time depending on each customer agreements.

4. Critical accounting estimates, assumptions and judgements

The preparation of consolidated financial statements in accordance with IFRS often requires management to make estimates about and apply assumptions or subjective judgment to future events or other matters that affect the reported amounts of the Corporation's assets, liabilities, revenues, expenses and related disclosures. Assumptions, estimates and judgments are based on historical experience, expectations, current trends and other factors that management believes to be relevant at the time at which the Corporation's consolidated financial statements are prepared. Management reviews, on a regular basis, the Corporation's accounting policies, assumptions, estimates and judgments in order to ensure that the consolidated financial statements are presented fairly in accordance with IFRS.

Critical accounting estimates and judgments are those that have a significant risk of causing material adjustment and are often applied to matters or outcomes that are inherently uncertain and subject to change.

As such, management cautions that future events often vary from forecasts and expectations and that estimates routinely require adjustment.

Management considers the following areas to be those where critical accounting policies affect the significant judgments and estimates used in the preparation of the Corporation's consolidated financial statements.

Revenue recognition of manufacturing contracts
The stage of completion of any manufacturing contract is assessed by management by taking into consideration all information available at the reporting date. In this process, management applies significant judgments about percentage-of-completion, actual work performed and the estimated costs to be incurred to complete work.

Impairment of goodwill and other non-current assets
At the end of each reporting period, the Corporation assesses whether there is any indication that the goodwill and non-current assets have been impaired. If any such indication exists, the recoverable amount of the asset is determined. The recoverable amount is the higher of its fair value less costs to sell and its value in use. In the measurement of the value in use, estimates of future cash flows are discounted. The use of different assumptions could result in different fair values and therefore, in different carrying amounts for goodwill and other non-current assets. If the discount rate had increased or decreased by 1% compared to the assumption taken by the Corporation, assuming other variables remain constant the recoverable amount would have been greater or lesser by approximately $2,200,000 ($1,600,000 as at June 30, 2014) and no impairment would have been recorded. If the growth rate had increased or decreased by 1% compared to the assumption taken by the

Corporation, assuming other variables remain constant the recoverable amount would have been greater or lesser by approximately $1,600,000 ($1,800,000 as at June 30, 2014) and no impairment would have been recorded.

Income taxes measurement
The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Corporation's entities' ability to utilize the underlying future tax deductions against future taxable income prior to expiry of the deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income. To the extent that management's assessment of any Corporation's entities ability to utilize future tax deductions changes, the Corporation would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

Slow moving and obsolete inventory
The value of slow moving and obsolete inventory is based on the Corporation's assessment of historical usage, estimated future demand and in some cases, the specific risks of loss on specifically identified inventory. The write-down may be reversed if the circumstances which caused it no longer exist.

Stock-based compensations and other stock-based payments
As regards to stock option granted, the Corporation uses the fair value based method of accounting. The fair value of stock options is determined using Black-Scholes pricing model, which required the use of certain assumptions, including future stock price volatility and expected life of instruments. The expected life is estimated using the contractual life of the instrument. The expected volatility is estimated using the historical volatility of the Corporation's stock over the same period as the contractual life. At the end of each reporting period, the Corporation revises its estimate of the number of equity instruments expected to vest.

5. Accounting standards and amendments issued but not yet adopted

The following revised standards are effective for annual periods beginning on or after January 1, 2018 for IFRS 9 and January 1, 2017 for IFRS 15, with earlier application permitted. On July 22, 2015, the IASB has confirmed a one-year deferral of the effective date of IFRS 15 to January 1, 2018. The Corporation has not yet assessed the impact of these standard and amendment or determined whether it will early adopt them.

IFRS 9, *Financial Instruments*, was issued in November 2009 and addresses classification and measurement of financial assets. It replaces the multiple category and measurement models in IAS 39, *Financial Instruments: Recognition and Measurement* with a single approach to determine whether a financial asset is measured at amortized cost, fair value through other comprehensive income or fair value through the statement of income (loss). IFRS 9 also replaces the models for measuring equity instruments. Such instruments are either recognized at fair value through the statement of income (loss) or at fair value through other comprehensive income. Where equity instruments are measured at fair value through other comprehensive income, dividends are recognized in the statement of income (loss) to the extent that they do not clearly represent a return of investment; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely.

Requirements for financial liabilities were added to IFRS 9 in October 2010 and they largely carried forward existing requirements in IAS 39, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss are generally recorded in other comprehensive income.

In May 2014, the IASB released IFRS 15, *Revenue from Contracts with Customers*, which establishes principles for reporting the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. It provides a single model in order to depict the transfer of promised goods or services to customers. The core principle of IFRS 15 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods and services. IFRS 15 also requires more comprehensive disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers.

IFRS 15 supersedes IAS 11, *Construction Contracts*, IAS 18, *Revenue*, and a number of revenue-related interpretations (IFRIC 13, *Customer Loyalty Programmes*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfers of Assets from Customers*, and SIC-31, *Revenue, Barter Transactions Involving Advertising Service*). IFRS 15 is effective for annual periods beginning on or after January 1, 2017, with earlier

adoption permitted. The Corporation has not yet assessed the impact of the adoption of this standard on its consolidated financial statements.

6. Business Combination

Description of the business combination

On December 5, 2013, the Corporation acquired all of the issued and outstanding shares of Piedmont Pacific Corporation ("Piedmont"), a corporation located in Oakland, CA and one of the leading manufacturers in the world of flexible pipe couplings and other pipe fittings for highly corrosive environments. Acquisition cost for this transaction was $4,252,165 ($US3,978,447) including certain working capital adjustments. The acquisition was financed by a private placement and concurrent additional non-brokered private placement of common shares of the Corporation at a price of $1.15 per Common Shares (adjusted to reflect the December 1st, 2014 five-to-one share consolidation) for total gross proceeds of $8,001,800.

Piedmont was integrated to the current activities of the Corporation and is using the testing, warehousing, packing and shipping capabilities of the existing facility in Vista, CA.

Assets acquired and liabilities assumed at the acquisition date

	December 5, 2013 $
Assets	
Current assets	
Cash and cash equivalents	23,981
Accounts receivable	498,140
Inventories	268,148
	790,269
Non-current assets	
Property, plant and equipment	
Machinery and equipment	13,787
Moulds	180,627
Intangible assets	
Customer backlog	59,425
Client relationships	2,079,885
Technical drawings	59,425
Trademark	470,272
Total	3,653,690
Liabilities	
Current liabilities	
Accounts payable and accrued liabilities	(263,461)
Income taxes payable	(34,434)
Deferred income tax liabilities	(616,911)
Total	(914,806)
Identifiable net assets acquired	2,738,884

The purchase price allocation shown above is final and is a summary of the assets acquired, the liabilities assumed and the consideration transferred at fair value as at the acquisition date. It was completed during the fourth quarter of fiscal year 2014. The original transaction was made in U.S. dollars and converted into Canadian dollars as at the acquisition date.

Sources and uses of funds at the transaction closing date

	December 5, 2013 $
Sources	
Private placement (note 19)	7,095,200
Concurrent additional non-brokered private placement (note 19)	906,600
	8,001,800
Uses	
Cash consideration transferred	(4,252,165)
Share issue expenses (note 19)	(636,096)
Working capital for the Corporation's current activities	(3,113,539)
	-

The balance of purchase price of a business combination to be paid was estimated based on the excess of net assets over the net book value agreed upon in the share purchase agreement as of the transaction closing date.

Costs related to the acquisition

The total acquisition-related costs amounted to $58,978 and are included in administrative expenses in the Consolidated Statement of earnings (loss) of 2014.

Determination of fair value

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at the acquisition-date fair value.

Accounts receivable, inventories, accounts payable and accrued liabilities and income taxes payable arising from a business combination are recognized at their fair value, which is not substantially different from their gross contractual value and expected receipts and disbursements.

The Corporation's valuation of intangible assets has identified customer backlog, client relationships, technical drawings and trademark. The assigned useful lives are 4 months for customer backlog, 10 years for client relationships, 10 years for technical drawings and undefined for trademark. Significant assumptions used in the determination of intangible assets, as defined by management, are year-over-year sales growth, discount rate and operating income before depreciation and amortization margin.

Goodwill arising from the business combination

	December 5, 2013 $
Cash consideration transferred and balance of purchase price payable	4,252,165
Less:	
Fair value of net identifiable acquired assets	(2,738,884)
Goodwill	1,513,281

The goodwill recognized from this business combination is not amortized and is not deductible for U.S. tax purposes.

Goodwill of $1,513,281 stems essentially from the synergies with other activities of the Corporation, the economic value of the workforce acquired as well as intangible assets that do not meet the criteria for separate recognition.

For impairment test purposes, goodwill has been allocated to the Corporation's cash-generating unit, United States. Notes 12 and 13 provides a roll-forward of the net book value balances of intangible assets and goodwill.

Impact of the business combination on the Corporation's financial performance

The Corporation's loss for the year ended June 30, 2014 includes $2,032,919 in revenues and a $310,630 profit generated from Piedmont additional business.

If the business combination had been completed on July 1, 2013, the Corporation's consolidated revenues for the year ended June 30, 2014 would have totalled $35,681,839 and consolidated loss for the year ended June 30, 2014 would have been ($1,454,190).

The Corporation considers the pro forma figures to be an approximate measurement of the financial performance of the combined business over a twelve-month period. However, pro forma information does not account for synergies or changes to historical transactions and is not necessarily indicative of the profit of the Corporation if the acquisition actually occurred on July 1, 2013, nor the profit that may be achieved in the future.

To determine the Corporation's pro forma consolidated revenues and profit if Piedmont had been acquired on July 1, 2013, the Corporation:

- Calculated depreciation of property, plant and equipment and amortization of other acquired intangible assets based on the fair value arising from initial recognition of the business combination rather than the carrying amounts recognized in the pre-acquisition financial statements.
- Calculated the borrowing costs on the Corporation's net indebtedness after the business combination.
- Calculated an additional income tax expense to reflect the pro forma adjustments described above.

7. Guaranteed deposit certificates

	June 30, 2015	June 30, 2014
	$	$
Guaranteed deposit certificates, held as collateral for credit cards, bearing interest at 0.90% and renewed monthly	**250,388**	-
Guaranteed deposit certificates, held as collateral for a lease agreement, bearing interest at 0.55%, and maturing in July 2015	**132,851**	-
Guaranteed deposit certificates, held as collateral for letters of credit bearing interest at 0.90% (at 1.15% as at June 30, 2014) and maturing in July 2015	**1,001,036**	1,000,662
Guaranteed deposit certificates, held as collateral for a lease agreement, bearing interest at 0.90% (at 0.90% as at June 30, 2014) and maturing in October 2015	**100,636**	100,636
Guaranteed deposit certificate denominated in US dollars held as collateral for a letter of credit, bearing interest at 0.10% (0.10% as at June 30, 2014) and maturing in September 2015	**19,379**	16,539
Guaranteed deposit certificate held as collateral for a lease agreement, bearing interest at 0.20% (0.20% as at June 30, 2014) and maturing in February 2015	**125,513**	107,009
	1,629,803	1,224,846

8. Accounts Receivable

	June 30, 2015	June 30, 2014
	$	$
Trade accounts receivable	**8,348,130**	7,682,304
Retentions from customer under manufacturing contracts	**1,018,469**	1,198,327
Allowance for doubtful accounts (i)	**(1,270)**	(547,764)
	9,365,329	8,332,867
Tax credits receivable	**99,885**	194,636
Other receivables	**410,936**	380,904
	9,876,150	8,908,408

Trade accounts receivable disclosed above include amounts that are past due at the end of the reporting period for which the Corporation has not recognized an allowance for doubtful accounts because there has not been a significant change in credit quality and the amounts are still considered recoverable. In some cases, the

Corporation holds the legal right to lien construction projects in the event that certain counterparties do not pay their balance within a specified period of time. The gross amount of accounts receivable for which an allowance for doubtful accounts is recorded is $1,270 ($775,367 as at June 30, 2014).

(i) Movement in the allowance for doubtful accounts

	June 30, 2015	June 30, 2014
	$	$
Balance at beginning of the year	**(547,764)**	(406,890)
Impairment losses recognized on receivables	**(336,170)**	(196,360)
Amounts written off during the year as uncollectible	**883,189**	55,605
Foreign exchange translation (gains) and losses	**(525)**	(119)
Balance at end of the year	**(1,270)**	(547,764)

There is no impairment or amount past due other than those related to accounts receivable.

9. Inventories

	June 30, 2015	June 30, 2014
	$	$
Raw materials	**1,040,487**	971,227
Finished goods	**2,914,924**	3,734,642
	3,955,411	4,705,869

As a result of variations in the ageing of its inventory of raw materials in Canada and in United States, the Corporation recognized an inventory provision for the year of $203,695 ($132,414 in fiscal year 2014).

13. Goodwill

The change in carrying value is as follows:

	$
Balance as at June 30, 2013	2,465,311
Plus: Business combination (note 6)	1,513,281
Effect of foreign exchange differences	31,556
Balance as at June 30, 2014	4,010,148
Effect of foreign exchange differences	**684,018**
Balance as at June 30, 2015	**4,694,166**

Goodwill and trademark with indefinite life have been allocated to the Corporation's cash-generating unit, United States and Canada, for impairment testing purposes. The carrying amount of goodwill and trademark with indefinite life were allocated to cash-generating units as follows:

	June 30, 2015	June 30, 2014
	$	$
Canada	**-**	-
United States		
Goodwill	**4,694,166**	4,010,148
Trademark with indefinite life	**549,560**	469,480
	5,243,726	4,479,628

The Corporation carries out its impairment test annually or more frequently if there is an indicator of impairment. The Corporation has aggregated its cash-generating units into countries for the purposes of the goodwill and trademark with indefinite life impairment test. The carrying values of the goodwill and trademark with indefinite life have been allocated for impairment testing purposes to these CGU groups.

The recoverable amount of these cash-generating units was determined based on a value-in use calculation which uses cash flow projections based on financial budgets approved by the Board of Directors.

Cash flow projections during the five-year budget period are based on the same expected gross profit throughout the budget period. Management believes that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of each of the cash-generating units.

The key assumptions to which the recoverable amounts of each of the CGU groups are most sensitive include growth rates for revenue, future gross profits on projects, products and services and discount rates applied to cash flow projections. Cash flows and future gross profit were projected based on past experience and actual operating results using forecasts approved by management. The discount rates were based on the Corporation's weighted average cost of capital using a standard capital structure and reflect specific risks related to the CGU groups under review. The calculation of the recoverable amounts was based on the following key assumptions:

As at June 30, 2015	**Growth rate for the terminal period**	**Post-tax discount rate**
Canada	3.0%	16.2%
United States	3.0%	16.2%

As at June 30, 2014	**Growth rate for the terminal period**	**Post-tax discount rate**
Canada	3.0%	16.2%
United States	3.0%	16.2%

In the third quarter of fiscal year 2015, the Corporation assessed the recoverable amount of the cash-generating unit "United States" at $30,172,000 ($24,062,000 in fiscal year 2014) and did not recognize any goodwill and

trademark with indefinite life impairment loss. The value-in use calculation was used to determine the recoverable amount of this cash-generating unit by applying new discounted projections of future cash flows based on a five-year financial forecast approved by management, based on past experience and consistent with external sources of information.

14. Bank loans

The bank loans for an authorized amount of $5,000,000 or US$5,000,000 bearing interest at CDN prime rate plus 1.00% (3.70% as at June 30, 2015 and 4.0% as at June 30, 2014) and at US prime rate plus 1.00% (4.75% as at June 30, 2015 and June 30, 2014) are secured by an assignment of accounts receivable and inventories and by Export Development Canada (“EDC”). As at June 30, 2015, $4,432,077 was used on this line of credit.

The Corporation has an unused credit facility available of $2,000,000 or US$2,000,000 bearing interest at CDN prime rate plus 1.00% (3.70% as at June 30, 2015 and 4.0% as at June 30, 2014) and at US prime rate plus 1.00% (4.75% as at June 30, 2015 and June 30, 2014). This credit facility is secured by EDC.

The Corporation has a credit facility enabling it to issue letters of credit for a maximum amount of $1,000,000. This credit facility is secured either by EDC or guaranteed deposit certificate and is unused as at June 30, 2015.

The Corporation has a credit facility enabling it to issue letters of credit for a maximum amount of $1,000,000. The credit facility is secured by $1,001,036 in guaranteed deposit certificate ($1,000,662 as at June 30, 2014). As at June 30, 2015, the Corporation issued $1,000,000 in letters of credit under this credit facility ($1,000,000 as at June 30, 2014).

The Corporation has access to hedging facility of $500,000. This facility is secured by EDC and is unused as at June 30, 2015 (not available as at June 30, 2014).

The Corporation has a credit facility enabling it to use a maximum amount of $400,000 on credit card for Corporation related expenses. This credit facility is secured $250,388 in guaranteed deposit certificate ($nil as at June 30, 2014).

The Corporation still has letters of credit amounting to $132,727 with its previous bank, which are secured by guaranteed deposit certificates ($111,337 as at June 30, 2014).

Covenants
The Corporation has undertaken to maintain covenants on a yearly basis in respect of the bank loans described above for the years ended June 30, 2015 and June 30, 2014. The Corporation’s bank facilities were renegotiated on April 13, 2015.

Long-term debt	**499,777**	331,212

(a) Bank loan
The bank loan of $242,625 bearing interest at 12.25% (effective rate of 25.3%) since an agreement was concluded on April 23, 2013 giving four options of three-month moratorium starting in April 2013 with an initial increase of 0.50% of the interest rate applicable and an increase of 0.125% of the interest rate applicable upon each used moratorium on the repayment of principal. The bank loan was completely reimbursed in December 2014.

(b) Bank loan
On September 20, 2014, an agreement was concluded for a loan amounting up to $460,000, secured by a first rank hypothec on the Ham-Nord plant, representing a carrying value of $1,300,000, bearing interest at prime rate plus 1.05% (5.90% as at June 30, 2015), payable in one instalment of $4,120 on September 23, 2015 and 131 monthly instalments of $3,480, principal only, maturing on August 23, 2026.

(c) Loans from other entities
The loan of $529,199 bearing interest at 12% (effective rate of 17.5%) since an agreement was concluded on April 23, 2013 giving four options of three-month moratorium starting in April 2013 with an initial increase of 0.50% of the interest rate applicable and an increase of 0.125% of the interest rate applicable upon each used moratorium on the repayment of principal. On September 30, 2013, the Corporation used the proceeds from an equity private placement (note 19) to reimbursed $500,000 of its loan from other entities. The bank loan is repayable in monthly instalments maturing January 1, 2016.

On August 28, 2014, an agreement was concluded giving a six-month moratorium option the repayment of principal with an increase of 0.25% of the interest rate applicable. On October 20, 2014, the Corporation has exercised its six-month moratorium option on the repayment of principal starting November 1, 2014.

(d) Loans from other entities
A loan of $54,385 ($US 43,543), bearing interest at 8.5% payable in monthly instalments of $2,231 ($US 1,900) and maturing July 1, 2017.

The annual principal instalments due on the long-term debt are $543,807 in 2016, $106,810 in 2017, $40,848 in 2018 and $38,280 in 2019.

18. Income Taxes

Income tax expenses (recoveries) are detailed as follows:

As at	**June 30, 2015 $**	June 30, 2014 $
Current tax expense:		
Current period	**11,117**	999
Adjustment for prior periods	**(1,974)**	28
	9,143	1,027
Deferred tax expense (recovery):		
Origination and reversal of temporary differences	**208,362**	(447,650)
Reduction (increase) in tax rate	**137,445**	(99,329)
Adjustment for prior periods	**70,898**	243,183
	416,705	(303,796)
Income taxes	**425,848**	(302,769)

Reconciliation of the Corporation's effective income tax expense (recovery):

The standard rate of the Canadian corporate income tax is 26.44 % (26.20 % for 2014).The increase is caused by a change in the Canadian provinces tax rate. The following is a reconciliation of income taxes calculated at the Canadian corporate tax rate to the expense for 2015 and 2014.

	June 30, 2015 $	June 30, 2014 $
Earnings (Loss) before income taxes	**698,273**	(1,758,900)
Income taxes at the standard rate of Canadian corporate tax of 26.44% (26.20% in 2014)	**184,623**	(460,696)
Tax effect from:		
Changes in statutory rates	**137,445**	(99,419)
Utilization of tax benefits previously unrecorded	**70,898**	241,183
Non-deductible stock-based payments	**640**	3,384
Tax credits	**26,386**	-
Items not affecting earnings	**(39,390)**	(38,514)
Non-deductible items	**34,500**	26,594
Other	**10,746**	24,699
Total income tax recovery	**425,848**	(302,769)

Deferred tax assets and liabilities

	June 30, 2015 $	June 30, 2014 $
Reconciliation to the consolidated statements of financial position:		
Deferred tax assets	**5,471,699**	5,215,051
Deferred tax liabilities	**(2,639,540)**	(2,414,000)
Net deferred tax assets	**2,832,159**	2,801,051

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in Canadian dollars)

Changes to deferred tax assets (liabilities) related to temporary differences as follows:

	Balance as at July 1, 2014 $	Recognized in earnings $	Recognized in equity $	Recognized through business combination (note 6) $	Balance as at June 30, 2015 $
Non-capital losses	1,101,077	(160,962)	-	-	940,115
Property, plant and equipment	(9,912)	(91,530)	-	-	(101,442)
Intangible assets	(1,006,029)	(177,197)	-	-	(1,183,226)
U.S. interests not deducted and deferred	2,594,507	471,375	-	-	3,065,882
Other assets	121,408	(10,578)	-	-	110,830
Foreign exchange difference recognized in equity	-	63,673	(63,673)	-	-
	2,801,051	**94,781**	**(63,673)**	**-**	**2,832,159**

	Balance as at July 1, 2013 $	Recognized in earnings $	Recognized in equity $	Recognized through business combination (note 6) $	Balance as at June 30, 2014 $
Non-capital losses	405,400	695,677	-	-	1,101,077
Property, plant and equipment	28,308	(38,220)	-	-	(9,912)
Intangible assets	(425,098)	35,980	-	(616,911)	(1,006,029)
U.S. interests not deducted and deferred	2,984,022	(389,515)	-	-	2,594,507
Other assets	131,432	(10,024)	-	-	121,408
Foreign exchange difference recognized in equity	-	9,898	(9,898)	-	-
	3,124,064	303,796	(9,898)	(616,911)	2,801,051

At June 30, 2015, the Corporation had the following tax losses carried forward available to reduce taxable income in the future, and investment tax credits carryovers to reduce income tax payable, and in respect of which the Corporation has not recognized a deferred tax on those from Canada.

Tax losses carried forward expire as follows:	Date	Canada	USA
		$	$
	2016	69,000	-
	2027	2,330,000	-
	2028	2,619,000	-
	2029	1,000	-
	2030	672,000	856,000
	2032	-	605,000
	2033	-	479,000
	2034	2,612,000	-
	2035	30,000	-
		8,333,000	**1,940,000**

Investment tax credits expire as follows	Date	Canada
	2020	9,000
	2021	76,000
	2022	141,000
	2023	51,000
	2025	36,000
	2026	22,000
	2027	38,000
	2028	6,000
	2029	21,000
		400,000

The ability to realize the tax benefits from these losses and investment tax credits is dependent upon a number of factors, including the future profitability of operations in the jurisdictions in which the tax losses and investment tax credits arose. Deferred tax assets are recognized in respect of tax losses and other temporary differences giving rise to deferred tax assets only to the extent that it is probable that sufficient taxable profits will be available to allow the asset to be recovered.

Accordingly, no deferred tax asset has been recognized on the following tax losses carried forward and temporary differences.

As at June 30, 2015	Canada	United States
	$	$
Tax losses carried forward	2,182,527	-
Development and exploration expenses	455,120	-
Capital losses	66,000	-
Research and development expenses	631,000	-
Property, plant and equipment	1,388,000	-
Intangible assets	23,000	-
Financing expenses	110,000	-
	4,855,647	**-**

As at June 30, 2014	Canada	United States
	$	$
Tax losses carried forward	2,165,699	-
Development and exploration expenses	518,000	-
Capital losses	75,000	-
Research and development expenses	625,000	-
Property, plant and equipment	1,182,000	-
Intangible assets	124,975	-
Financing expenses	148,000	-
Other assets	20,000	-
	4,858,674	-

19. Capital Stock

Share consolidation (reverse stock split)

On December 1st, 2014, the Corporation effected a consolidation of its issued and outstanding common shares on a five-to-one basis (the "Share Consolidation"). The Share Consolidation affected all shareholders, optionholders and warrantholders uniformly and thus did not materially affect any securityholder's percentage of ownership interest. All references in these consolidated financial statements to common shares, options and share purchase warrants have been retroactively adjusted to reflect the Share Consolidation.

The 104,632,977 common shares issued and outstanding immediately prior to the Share Consolidation were consolidated into 20,926,551 common shares. The Corporation's outstanding stock options and share purchase warrants were adjusted on the same basis with proportionate adjustments being made to each stock option and share purchase warrant exercise price.

All share, option and share purchase warrant and per share, option and share purchase warrant data have been retroactively adjusted to reflect and give effect to the Share Consolidation as if it occurred at the beginning of the earliest period presented.

Share Capital

The Corporation has authorized an unlimited number of common shares (being voting and participating shares) with no par value.

On September 30, 2013, the Corporation issued, by way of an equity private placement, 1,940,909 common shares with gross proceeds of $2,135,005, expenses of $54,200 for a net proceeds of $2,080,805. The Corporation used the proceeds to reimburse partially its long-term debt and to support its working capital. Among the common shares issued in connection with this offering, 142,862 common shares were issued to reimburse the loans from shareholders amounting to $157,154.

On December 5, 2013, the Corporation issued, by way of a bought deal private placement and concurrent additional non-brokered private placement, 6,956,517 common shares with gross proceeds of $8,001,800, expenses of $636,096 for net proceeds of $7,365,704. The Corporation used the proceeds to complete the acquisition of Piedmont (note 6) and to support its working capital.

Stock options

The Corporation has established a stock option plan whereby the Board of Directors may grant stock options to directors, executive officers, key employees and consultants providing services to the Corporation. The Board of Directors determines, at its discretion, the vesting terms, if applicable, the expiry date of options and the number of options to be granted. The maximum number of shares that may be issued under the plan amounts to 1,100,000.

For the year ended June 30, 2015, the Corporation recorded $2,422 ($12,917 in 2014) as stock-based compensation for options granted to its directors, officers and key employees.

The following table summarizes the situation of the Corporation's stock-based compensation plan as at June 30, 2015 and June 30, 2014 and the change during the years ended on these dates:

Years ended June 30,		**2015**		2014
	Number	**Weighted average exercise price**	Number	Weighted average exercise price
		$		$
Outstanding - Beginning of year	**347,500**	**2.66**	424,900	2.83
Expired	**-**	**-**	(77,400)	3.56
Forfeited	**(16,000)**	**3.13**	-	-
Outstanding - End of year	**331,500**	**2.64**	347,500	2.66

As at June 30, 2015, the following stock options were granted:

Exercise price	Holders	Number of shares	Weighted average remaining life (years)	Weighted average exercise price
$				$
3.75	Directors	33,000	4.41	0.37
3.75	Directors	4,000	5.04	0.05
2.50	Employees	50,000	5.37	0.38
2.50	Directors	244,500	5.23	1.84
		331,500	5.17	2.64

As at June 30, 2015, the following stock options could be exercised:

Exercise price	Number of shares	Weighted average exercise price
$		$
3.75	37,000	0.42
2.50	294,500	2.22
	331,500	2.64

Warrants

In the course of its financing transactions made during fiscal year 2011 and previous years, the Corporation issued warrants entitling them the right to acquire shares at a predetermined price. Each warrant issued entitles the holder to acquire one common share of the Corporation.

The warrants outstanding as at June 30, 2015 and June 30, 2014 and the change during the years ended on those dates are summarized in the following table:

Years ended June 30,		**2015**		2014
	Number	**Weighted average exercise price**	Number	Weighted average exercise price
		$		$
Outstanding, beginning of year	**-**	**-**	200,000	2.50
Expired	**-**	**-**	(200,000)	2.50
Outstanding, end of year	**-**	**-**	-	-

20. Additional information about the nature of costs components

a) Expenses by nature

Years ended June 30,	**2015**	2014
	$	$
Material	**23,480,688**	18,321,869
Changes in inventories of raw material, finished goods and costs incurred in excess of billings	**103,864**	(367,997)
Salaries and fringe benefits	**12,705,878**	10,401,203
Subcontractors and professional fees	**3,741,729**	1,524,354
Rent, electricity, insurance and office expenses	**1,771,042**	2,283,064
Telecommunications and travel expenses	**1,774,341**	1,195,042
Bad debt expenses	**337,443**	196,360
Other expenses	**1,832,575**	1,249,437
Total cost of goods sold, operating, selling and administrative expenses and research and development expenses - net	**45,747,560**	34,803,332

b) Depreciation and amortization

The Corporation has elected to present depreciation and amortization as a separate line item in its consolidated statement of loss, as opposed to reflecting the fraction of such amount that pertains to each of the cost of goods sold, operating expenses, selling expenses and administrative expenses, within those cost categories. The following tables provide: i) a breakdown of the depreciation and amortization expense by cost category as noted above, for the years ended June 30, 2015 and 2014 and ii) the amounts of cost of goods sold, operating expenses, selling expenses, administrative expenses and research and development expenses - net, if depreciation and amortization were allocated within those cost categories.

Depreciation by function

Years ended June 30,	**2015**	2014
	$	$
Cost of goods sold	**251,283**	176,005
Operating expenses	**2,588**	3,470
Selling expenses	**33,091**	37,178
Administrative expenses	**76,865**	77,406
	363,827	294,059

Amortization by function

Years ended June 30,	**2015**	2014
	$	$
Cost of goods sold	**420,990**	380,252
Selling expenses	**388,793**	514,210
Administrative expenses	**50,549**	56,423
	860,332	950,885

Cost per function including depreciation, amortization and impairment of intangible assets

Years ended June 30,	**2015**	2014
	$	$
Cost of goods sold	**35,805,763**	26,137,283
Operating expenses	**1,032,687**	862,953
Selling expenses	**4,963,048**	4,593,899
Administrative expenses	**4,904,400**	4,233,996
Research and development expenses – net	**265,821**	220,145
	46,971,719	36,048,276

c) Research and development expenses – net

Years ended June 30,	**2015**	2014
	$	$
Gross research and development expenses	**265,821**	312,047
Research and development tax credits and grants	**-**	(91,902)
	265,821	220,145

d) Other (gains) losses – net

Years ended June 30,	**2015**	2014
	$	$
Exchange loss	**469,992**	12,123
Other revenues	**(39,348)**	(48,179)
(Gain) Loss on disposal of property, plant and equipment	**(24,014)**	5,798
Loss on disposal of intangible assets	**-**	721
	406,630	(29,537)

21. Net Earnings (Loss) Per Share

The following table sets out the weighted average basic and diluted number of outstanding shares used to compute the basic and diluted earnings (loss) per share:

Years ended June 30,	2015	2014
Net earnings (loss)	**$272,425**	($1,456,131)
Basic and diluted weighted average number of share outstanding[1]	**20,926,551**	17,431,381

[1] Adjusted to reflect the December 1st, 2014 five-to-one share consolidation (see note 19 – Capital Stock).

Items excluded from the calculation of diluted net earnings (loss) per share because the exercise price was greater than the average market price of the common shares		
Stock options	**331,500**	316,500

For the years ended June 30, 2015 and 2014, there was no difference in the basic and diluted weighted average number of shares outstanding, since the effect of the stock options and warrants would have been anti-dilutive. Accordingly, the diluted earnings (loss) per share for these years is calculated using the basic weighted average number of shares outstanding.

22. Cash Flows

a) The change in non-cash working capital items is as follows:

Years ended June 30,	2015	2014
	$	$
Accounts receivable	**(243,538)**	(1,905,620)
Inventories	**218,539**	(385,379)
Costs incurred in excess of billings	**151,185**	134,413
Prepaid expenses	**(290,031)**	(226,452)
Accounts payable and accrued liabilities	**(78,013)**	43,559
Provisions	**(4,273)**	34,824
Billings in excess of work in process	**(159,242)**	(284,365)
	(405,373)	(2,589,020)

b) Cash and cash equivalents consist of the following:

As at June 30,	2015	2014
	$	$
Beginning of year		
Cash and cash equivalents	**497,752**	303,936
Bank overdraft	**(113,383)**	(256,701)
	384,369	47,235
End of year		
Cash and cash equivalents	**1,335,887**	497,752
Bank overdraft	**(2,052)**	(113,383)
	1,333,835	384,369

c) Non-cash transaction

The principal non-cash transaction is the transfer of containerized units from Inventory – finished goods to Property, plant and equipment – Containerized units for lease for an amount of $846,513 (nil as at June 30, 2014), since these containers have been leased to a client during the second quarter.

23. Financial Risk Management

The Corporation's activities expose it to a variety of financial risks: market risks (including currency risk, cash flow interest risk and fair value interest risk), credit risk and liquidity risk. The Corporation's overall financial risk management program focuses on mitigating unpredictable financial market risks and their potential adverse effects on the Corporation's financial performance.

The Corporation's financial risk management is generally carried out by the corporate team, based on policies approved by the Board of Directors. The identification and evaluation of the financial risks are the responsibility of the corporate team.

Overview

The Corporation's financial instruments and the nature of risks which they may be subject to are set out in the following table:

	Risks			
	Market risks			
Financial instrument	**Currency**	**Interest rate**	**Credit**	**Liquidity**
Cash and cash equivalents	X	X	X	
Guaranteed deposit certificates	X	X	X	
Accounts receivable	X		X	
Other Assets	X		X	
Bank overdraft	X	X		X
Bank loans	X	X		X
Accounts payable and other accrued liabilities	X			X
Long-term debt	X	X		X

Currency risk

The Corporation is exposed to exchange risk as a result of its U.S. dollar purchases and sales and also as a result of its foreign subsidiary net assets. To limit the impact of fluctuations of the Canadian dollar over the U.S. dollar, the Corporation matches, in general and when possible, the cash receipts in a foreign currency with the cash disbursements in the same foreign currency. The Corporation does not use derivative financial instruments to cover the variability of cash flows in foreign currencies.

As at June 30, 2015, if the Canadian dollar had increased or decreased by five percent (5%) compared to the U.S. dollar, assuming that all other variables remained constant, net earnings for the year ended June 30, 2015 would have been greater or lesser by approximately $157,112 ($82,156 for the year ended June 30, 2014).

The financial assets and liabilities denominated in U.S. dollars included in the Canadian corporation are as follows:

	June 30, 2015	June 30, 2014
	$	$
FINANCIAL ASSETS		
Cash and cash equivalents	**178,131**	23,495
Guaranteed deposits certificates	**19,379**	16,539
Accounts receivable	**91,018**	959,422
	288,528	999,456
FINANCIAL LIABILITIES		
Bank overdraft	**(26,829)**	(65,041)
Bank loans	**(3,279,822)**	(2,055,774)
Accounts payable and accrued liabilities	**(304,125)**	(521,767)
	(3,610,776)	(2,642,582)

Cash flow and fair value interest rate risk

In the normal course of business, the Corporation is exposed to interest rate fluctuation risk as a result of the cash and cash equivalents, guaranteed deposit certificates, bank overdraft, bank loans and long-term debt. The Corporation manages its interest rate fluctuation exposure by allocating its financial debt between fixed and floating-rate instruments.

The guaranteed deposit certificates and unsecured loans bear interest at fixed rates and are accounted for at amortized cost. The Corporation is, therefore, not exposed to the risk of cash flows or changes in fair value resulting from interest rate fluctuations.

The bank loans bear interest at floating rates and the Corporation is, therefore, exposed to the cash flow risks resulting from interest rate fluctuations.

As at June 30, 2015 and 2014, a 25-basis-point increase or decrease in interest rates, assuming that all other variables remain constant, would not have had a significant impact on the Corporation’s net earnings and comprehensive income. These changes were retained because they are considered reasonably possible according to observations and the economic situation.

Credit risk

Credit risk relates to the risk that a party to a financial instrument will not fulfil some or all of its obligations, thereby causing the Corporation to sustain a financial loss. The main risk relates to accounts receivable. To manage credit risk from accounts receivable, the Corporation reviews credit limits, monitors aging of accounts receivable and establishes an allowance for doubtful accounts based on specific customer information and general historical trends. Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable. As at June 30, 2015, the allowance for doubtful accounts was $1,270 ($547,764 as at June 30, 2014).

The carrying amount on the consolidated statement of financial position of the Corporation's financial assets exposed to credit risk represents the maximum amount exposed to credit risk.

The following table summarizes the Corporation’s exposure to credit risk:

	June 30, 2015	June 30, 2014
	$	$
Cash and cash equivalents	**1,335,887**	497,752
Guaranteed deposit certificates	**1,629,803**	1,224,846
Accounts receivable, net of tax credits receivable	**9,776,265**	8,713,772
Other Assets	**60,515**	44,826

The Corporation is also exposed to credit risk due to its cash, its deposit certificate and its investment certificates. The Corporation has $2,965,690 ($1,722,598 in 2014) in cash and guaranteed deposits certificates with banking institutions that the Corporation considers at a low risk for loss.

The table below summarizes the ageing of trade accounts receivable as at:

	June 30, 2015	June 30, 2014
	$	$
Current	**5,147,732**	4,038,025
Past due 1 to 30 days	**2,021,805**	1,433,157

Liquidity risk

Liquidity risk is the risk that the Corporation will be unable to fulfil its obligations on a timely basis or at reasonable cost. The Corporation manages its liquidity risk by monitoring its operating requirements and using various funding sources to ensure its financial flexibility. The Corporation prepares budgets and cash forecasts to ensure that it has sufficient funds to fulfil its obligations.

For its investing activities, the Corporation will evaluate its liquidity needs when applicable and take the necessary action.

The following table presents the financial liability instalments payable when contractually due including accrued interest:

As at June 30, 2015	**Carrying amount**	**0 - 1 year**	**1 - 2 years**	**2 - 3 years**	**4 years and more**
	$	$	$	$	$
Bank overdraft	2,052	2,052	-	-	-
Bank loans	4,432,077	4,432,077	-	-	-
Accounts payable and accrued liabilities	4,729,427	4,729,427	-	-	-
Long-term debt	1,269,191	617,010	136,235	91,693	424,253
Total	**10,432,747**	**9,780,566**	**136,235**	**91,693**	**424,253**

As at June 30, 2014	Carrying amount	0 - 1 year	1 - 2 years	2 - 3 years	4 years and more
	$	$	$	$	$
Bank overdraft	113,383	113,383	-	-	-
Bank loans	3,555,774	3,555,774	-	-	-
Accounts payable and accrued liabilities	4,417,197	4,417,197	-	-	-
Long-term debt	1,203,336	849,401	327,413	24,328	2,194
Total	9,289,690	8,935,755	327,413	24,328	2,194

Fair value

The fair value of financial instruments is based on quoted market prices when an active market exists. Otherwise, it is estimated using techniques and valuation models, such as analysis of discounted cash flows for the long-term debt, for which the significant unobservable inputs used are the discount rates which reflects the Corporation’s credit risk.

There was no transfer between the levels during the year.

The carrying amount and estimated fair value of financial instruments are as follows:

Financial instruments whose fair value approximates carrying value
Cash and cash equivalents, guaranteed deposit certificates, accounts receivable, other assets, bank overdraft, bank loans and accounts payable and accrued liabilities are financial instruments whose fair value approximates their carrying value due to their short-term maturity.

Long-term debt
The fair value of the long-term debt has been established by discounting the future cash flows at an interest rate to which the Corporation would currently be able to obtain for loans with similar maturity dates and terms. The fair value of the long-term debt is $1,043,584 ($1,056,208 as at June 30, 2014) was determined using Level 2.

24. Capital Management

The Corporation's objective in managing capital is to ensure sufficient liquidity to pursue its growth while at the same time taking a prudent approach towards financial leverage and financial risk.

The Corporation's capital is composed of net debt and shareholders' equity. Net debt consists of interest-bearing debt less cash. The Corporation's primary uses of capital are to finance increases in non-cash working capital and capital expenditures for capacity expansion and integration.

The Corporation monitors its performance through different ratios such as those required under its credit facility and long-term debt arrangements.

Credit facility and long-term debt arrangements require that the Corporation meet certain financial ratios at fixed points in time. The financial ratios are, as at June 30, 2015:

- Working capital ratio, defined as current assets divided by current liabilities greater than or equal to 1.25:1.00;
- Debt-to-equity ratio, defined as total debt excluding deferred taxes divided by equity of less than or equal to 2.00:1.00; and
- Fixed charge coverage ratio, including all capital and interest payments on borrowings due and capital expenditures, as defined, greater than or equal to 1.00:1.00.

As at June 30, 2015 and 2014, the Corporation was in compliance with the ratios required under its credit facility and long-term debt arrangements.

25. Leases

Leasing arrangements

Operating leases relate to leases of premises with lease terms of between 1 and 10 years. The Corporation has an option to renew the lease for one premise for an additional term of 5 years. The Corporation does not have an option to purchase the leased premises at the expiry of the lease periods.

Payments recognized as an expense

Years ended June 30,	**2015**	2014
	$	$
Minimum lease payments	**825,015**	618,010
	825,015	618,010

Non-cancellable operating lease commitments

	June 30, 2015	June 30, 2014
	$	$
Not later than 1 year	**825,015**	618,010
Later than 1 year and not later than 5 years	**2,908,748**	2,191,365
Later than 5 years	**1,744,694**	1,718,568
	5,478,457	4,527,943

Liabilities recognized in respect of non-cancellable operating leases

	June 30, 2015	June 30, 2014
	$	$
Deferred rents		
Current	**7,898**	11,478
Non-current	**116,522**	102,895
	124,420	114,373

26. Segment Information

Products from which reportable segments derive their revenues

The Corporation operates under a single reportable segment consisting of delivering drinking water and process water production and wastewater treatment systems, including related services.

The following is an analysis of the Corporation's revenues for the year for the continuing operations.

Years ended June 30,	**2015**	2014
	$	$
Revenues from sales of consumables	**20,241,853**	17,184,963
Manufacturing contracts revenues	**28,458,007**	17,646,551
	48,699,860	34,831,514

Geographical information

The Corporation is domiciled in Canada. The result of its revenue from external customers in Canada is \$17,274,034 (\$12,417,767 in 2014), and the total revenue from external customers from other countries is \$31,425,826 (\$22,413,747 in 2014). Detailed information for the Corporation's markets is as follows:

Years ended June 30,	**2015**	2014
	$	$
Revenues from external customers		
Revenue according to geographic location		
Canada	**17,274,034**	12,417,767
United States	**25,028,905**	17,927,812
Tunisia	**402,185**	208,601
China	**2,374,719**	1,422,457
United Arab Emirates	**142,956**	927,447
Mexico	**251,540**	193,926
France	**299,918**	-
Haïti	**363,210**	-
Indonesia	**367,950**	-
Egypt	**293,714**	-
South Korea	**597,158**	-
Other	**1,303,571**	1,733,504
	48,699,860	34,831,514

Revenues are attributed to the various countries according to the customer's country of residence.

As at June 30,	2015	2014
	$	$
Non-current assets other than financial instruments and deferred tax assets according to geographic location		
Canada	**3,097,671**	1,561,921
United States	**12,209,857**	11,159,574
	15,307,528	12,721,495

Information about major customers

For the fiscal year ended June 30, 2015, the Corporation derived more than ten percent (10%) of its revenues from a single external customer. For the fiscal year ended June 30, 2014, no customer accounted for more than ten percent (10%) of its revenues.
