1. GENERAL

In this Annual Information Form and unless the context otherwise requires, the words “Corporation” or “H₂O Innovation” refer collectively to H₂O Innovation Inc. and its subsidiaries.

Products and services offered by the Corporation are thoroughly described on its website at www.h2oinnovation.com. Copies of each press release issued by the Corporation are also available on the website. Information on the website is not incorporated by reference in this Annual Information Form.

Data relating to market and industry forecasts presented in this Annual Information Form are derived from various publicly available sources. While management of the Corporation believes these sources to be independent and reliable, the accuracy and completeness of that information are not guaranteed and were not independently verified by the Corporation.

Unless otherwise indicated, money figures are expressed in Canadian dollars. The “US\$” symbol refers to American dollars. The “€” symbol refers to Euros.

2. CAUTIONARY STATEMENTS WITH RESPECT TO FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Information Form may constitute “forward-looking” statements which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Corporation, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. When used in this Annual Information Form, such statements use such words as “anticipate”, “if”, “believe”, “continue”, “could”, “estimate”, “expect”, “intend”, “may”, “plan”, “potential”, “predict”, “project”, “should” or “will” and other similar terminology. These statements reflect current expectations of the Corporation regarding future events and operating performance and speak only as of the date of this Annual Information Form. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements. Although the forward-looking statements contained in this Annual Information Form, or any referenced document therein, are based upon what management of the Corporation believes are reasonable assumptions and actual results may be consistent with these forward-looking statements. Accordingly, these statements should not be unduly relied upon by shareholders. These forward-looking statements are made as of the date of this Annual Information Form and subject to applicable law; the Corporation does not intend to update said forward-looking statements.

Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this Annual Information Form. Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about: (i) foreign currency; (ii) interest rate; (iii) credit; (iv) liquidity; (v) competitive environment; (vi) operating risks; (vii) fixed price contracts entered into by the Corporation; (viii) the Corporation’s capacity to secure performance guarantees; (ix) the Corporation’s management and employees; (x) capital investment by the Corporation’s customers; (xi) current global financial conditions; (xii) implementation of its commercial strategic plan by the Corporation; (xiii) potential product liabilities and other lawsuits to which the Corporation may be subject; (xiv) additional financing and dilution; (xv) market liquidity of the Corporation’s common shares; (xvi) shortage of raw materials; (xvii) development of new products; (xviii) acquisition and expansion; and (xix) technology and regulatory changes.

3. CORPORATE STRUCTURE

3.1 Name and incorporation

The Corporation was incorporated under the name “Hebron Fjord Resources Inc.” by Articles of Amalgamation under the *Canada Business Corporations Act* on August 23, 1995, and results from the amalgamation of Chastel Resources Inc. and 3152383 Canada Inc. On December 1, 2000, the Corporation changed its corporate name to “H₂O Innovation (2000) Inc.” and then changed its corporate name again on December 4, 2008, to “H₂O Innovation Inc.”.

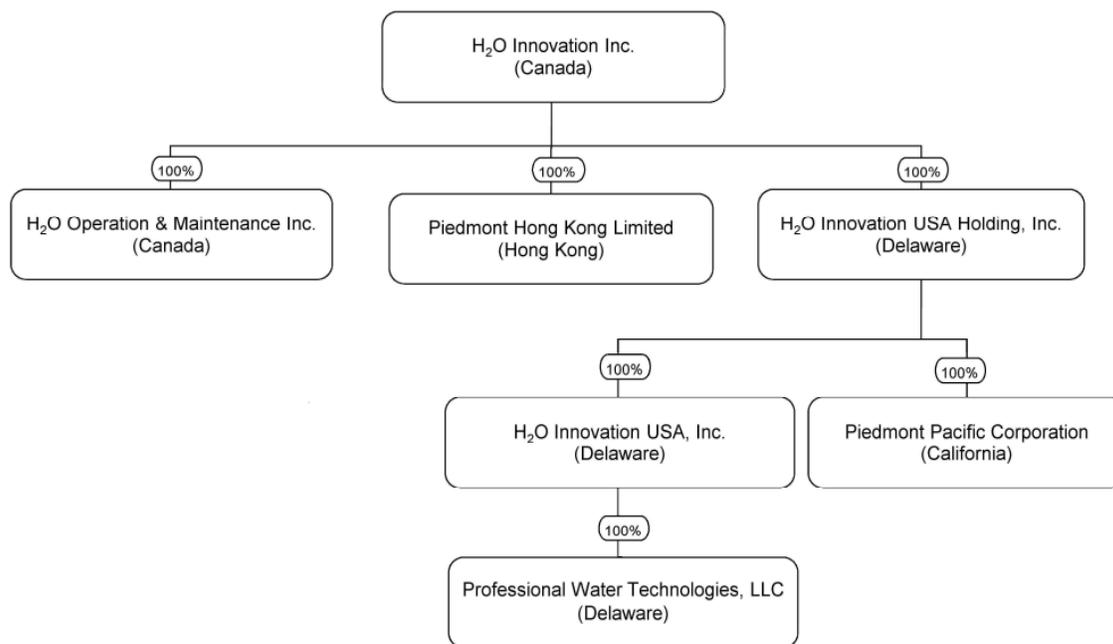

On March 1, 2006, the Corporation completed a consolidation of its common shares on the basis of ten (10) common shares then issued and outstanding for one (1) new common share. Terms and conditions of warrants and stock options then issued and outstanding were adjusted accordingly as of the consolidation date.

A second consolidation of the Corporation’s common shares occurred on December 1, 2014 on the basis of five (5) common shares then issued and outstanding for one (1) new common share. Terms and conditions of stock options then issued and outstanding were adjusted accordingly as of the consolidation date.

The Corporation’s head office is located, since December 15, 2011, at 330 Saint-Vallier Street East, Suite 340, Quebec City, Province of Quebec, G1K 9C5, Canada.

3.2 Organizational Chart

The following organizational chart shows the principal subsidiaries of the Corporation and their respective jurisdiction of incorporation as of September 22, 2015.

4. GENERAL DEVELOPMENT OF THE BUSINESS

4.1 The Corporation

As a complete solution provider, H₂O Innovation designs, manufactures and commissions customized integrated water treatment systems and provides a complete line of specialty products such as chemicals, consumables and couplings for multiple markets. Whether it is for the production of drinking water and industrial process water, the reclamation and reuse of water, and the treatment of wastewater, the solutions provided by H₂O Innovation intend to combine the best available expertise with the most advanced membrane technology and products. The Corporation's reliable, state-of-the-art, eco-friendly solutions are intended to streamline end-user's costs, optimize the water treatment, and maximize the efficiency, the performance and the longevity of a water treatment system.

H₂O Innovation's vision is to become the best in North America at providing membrane-related water treatment solutions and technologies and its mission is to provide safe, customized and integrated water treatment solutions in an even-changing environment. In order to provide outstanding customer care and to secure long-term relationships with its customers, H₂O Innovation provides multiple specialty products and services.

4.2 Three-year history

Over the past three years, the following events significantly influenced the general development of the Corporation's business:

Financial year ended June 30, 2015:

- Start-up of a new venture in the leasing and the operating and maintenance of water treatment systems under the name "H₂O Operation & Maintenance Inc."
- Development and commercialization of innovative initiatives such as the FiberFlex™ skid and the SPMC™ (System Performance Monitoring System) software.
- Securing the largest contracts in Piedmont Pacific Corporation's history to provide 33,500 couplings for two desalination plants located in Qatar through an important engineering, procurement and construction company in Spain. These contracts are described in a press release dated July 4, 2015 available on the Corporation's website.

- Completion of the commissioning of one of the largest drinking water project designed by H₂O Innovation, which was designed for the City of Delaware in Ohio. This first FiberFlex™ system comprised of three (3) ultrafiltration trains and five (5) nanofiltration trains treating water from different raw water supply sources. This project is described in a press release dated February 4, 2015 available on the Corporation's website.
- Completion of a share consolidation of the Corporation's common shares on the basis of five (5) common shares then issued and outstanding for one (1) new common share. This consolidation is described in a press release dated December 1, 2014 available on the Corporation website.
- Beginning trading the Corporation's common shares on the OTCQX marketplace in the United States under the ticker symbol "HEOFF". OTCQX is operated by OTC Markets Group for established U.S. and international companies. This transaction is described in a press release dated September 29, 2014 available on the Corporation website.

Financial year ended June 30, 2014:

- Securing over the year \$41.8 million of new bookings of water treatment projects, pushing order backlog to a record high of \$38.3 million as of June 30, 2014.
- Securing in February 2014 a major contract for a seawater reverse osmosis system that will be the second largest seawater reverse osmosis system in the United States. Such contract has a value of \$10 million and consists to design, build and supply major equipment for the Monterey Peninsula Water Supply Project and to provide commissioning services. This contract is described in a press release dated February 12, 2014 available on the Corporation's website.
- Acquisition on December 5, 2013 of all of the issued and outstanding shares of Common Stock of Piedmont Pacific Corporation ("Piedmont"), a company located in California and one of the leading manufacturers in the world of flexible pipe couplings and other pipe fittings for highly corrosive environments. Such acquisition has been done for a total consideration of US\$3.9 million. Piedmont provides a broad product line that spans a wide range of industrial and municipal applications mostly using membrane-related technologies and has been the first to introduce to the water treatment market couplings made of duplex and super duplex stainless steel. This transaction is described in a press release dated November 25, 2013 available on the Corporation's website.
- Closing on December 5, 2013 of a bought deal private placement and concurrent additional non-brokered private placement of Common shares of the Corporation for a total gross proceeds of approximately \$8 million. Certain insiders of H₂O Innovation participated in such private placements and subscribed to Common shares of the Corporation. Investissement Québec, for its part, has participated in the bought deal private placement and has subscribed to a certain number of Common shares representing 18.28% of the issued and outstanding Common shares of the Corporation. The net proceeds of such private placements have been used by the Corporation to finance the acquisition of Piedmont and for working capital purposes. This transaction is described in press releases dated November 25, 2013 and December 5, 2013 available on the Corporation's website.
- Closing on September 30, 2013 of a non-brokered private placement of approximately \$1.9 million with a group of private investors and shares for debt for an amount of approximately \$157,000. The proceeds of such private placement have been used to reimburse partially the Corporation's long-term debt and to support its working capital. Through this financing, H₂O Innovation has increased the institutional ownership of La Caisse de dépôt et de placement du Québec and welcoming Cote 100 Inc. as a new shareholder. Common shares have also been issued to certain Corporation's creditors to reduce its long-term debt. This transaction is described in a press release dated September 30, 2013 available on the Corporation's website.

Financial year ended June 30, 2013:

- Termination on May 23, 2013 of the joint venture in India. H₂O Innovation sells its participation of 49% in the Indian joint venture formerly known as H₂O Innovation India Limited. This transaction is described in a press release dated May 28, 2013 available on the Corporation's website.
- Delivery, during the year, of two (2) important turnkey projects for large customers in the oil and gas industry. One of these projects consist of water and wastewater treatment systems for a workers' camp in Alberta. The systems were installed in modular buildings shipped to site and adapted to extreme weather conditions. The second turnkey project, a water treatment system, includes a pre-fabricated modular building split into four (4) sections that were reconnected together once delivered on site.

4.3 Products and services offered by the Corporation

H₂O Innovation has developed its business model on two synergetic and related areas of activity: (i) the sale of water and wastewater treatment systems, and (ii) the sale of specialty products and services, which includes the sale of equipment in the maple syrup industry.

4.3.1 Water and Wastewater Treatment Systems

The Corporation designs, manufactures, and markets systems and equipment for the production of drinking water, the reclamation of water, desalination, the production of industrial process water and the treatment of wastewater (sanitary and industrial).

The majority of the systems sold by the Corporation are custom-designed. Each system is tailored to the customers' requirements and to the specific characteristics of the water to be treated. Mostly based on membrane filtration and bioreactor technologies, these systems combine the varied technological knowledge, know-how and expertise offered by the Corporation to its customers.

In addition, H₂O Innovation holds a series of patented technologies such as the Bio-Brane™ and the Bio-Wheel™. These technologies for applications requiring bioreactors allow the Corporation to target the wastewater and water reuse markets.

In order to improve its offer to its customers, H₂O Innovation designed the FiberFlex™ which consists of a skid that provides interchangeability and accommodates several types of ultrafiltration modules similar to reverse-osmosis elements. The FiberFlex™ provides the opportunity to take advantage of a much wider spectrum of current and future hollow fiber products.

The Corporation also developed a containerized membrane bioreactor, which is an advanced wastewater treatment solution that can meet typical wastewater effluent regulations throughout North America. Fully integrated in a standard shipping container, this containerized membrane bioreactor can be easily transported to an isolated work site or to remote communities with access problems.

The water/wastewater treatment systems activity sector accounted for 58.4% in 2015 and 50.7% in 2014 of the total consolidated revenues of the Corporation. The revenues of this area were \$28.4 million in 2015 and \$17.6 million in 2014.

4.3.2 Specialty Products and Services

The Corporation sells products and membrane filtration systems' spare parts to serve both the needs of its installed customer base and of other customers who have not previously purchased water treatment systems from the Corporation. These spare parts include pumps, valves, membranes, filters, media, and any other replacement parts of a water (or wastewater) treatment system. The Corporation also synthesizes and manufactures a unique product line of sustainable specialty chemicals for membrane pre-treatment applications (antiscalants), and develops specific blends for maintenance, preservation, and cleaning of membrane systems that maximize the operating efficiency, economy, performance, and longevity of reverse osmosis systems. The Corporation's specialty chemicals for membrane filtration systems are marketed under the brand name PWT™.

Through Piedmont, H₂O Innovation sells and provides a broad line of couplings and fittings that spans a wide range of industrial and municipal applications mostly using membrane-related technologies. Those couplings and fittings are manufactured with polymers, stainless steel or duplex stainless steel and are designed for specific membrane filtration applications, such as ultrafiltration and reverse osmosis. The sale of these products multiplies cross-selling opportunities coming from the existing sales network of specialty chemicals by selling chemicals to the same customers who regularly buy couplings.

In this area of activities, the Corporation also includes the revenues coming from the sale of equipment for the production of maple syrup. H₂O Innovation markets its reverse osmosis technology in the maple syrup industry. The use of this technology for the benefit of the maple syrup producers' allows the Corporation to expand its business activities in an industry sector where its technology may be applied. The Corporation offers a complete line of maple syrup equipment that meets the maple syrup producers' needs, such as evaporators, reverse osmosis separators, membranes, fitting, tubing, tanks, press filters and other equipment related to the maple syrup industry. H₂O Innovation differs itself with innovative products.

In addition to all the technical and maintenance services offered by the Corporation in order to support customers' system operation on a continuous basis (including supply of spare parts, repair and/or change of components), the Corporation, through its subsidiary H₂O Operation & Maintenance Inc., offers leasing and operating and maintenance services of water treatment systems.

Finally, during the last financial year, H₂O Innovation has developed and is now commercializing its SPMC™ software that combines early detection of any issues that may arise, system optimization, remote troubleshooting and accessibility of systems, and common data storage all into one, simple platform.

The specialty products and services sector accounted for 41.6% in 2015 and 49.4% in 2014 of the total consolidated revenues of the Corporation. The revenues of this sector amounted to \$20.2 million in 2015 and \$17.2 million in 2014.

4.4 Markets, distribution methods, suppliers and customers

The Corporation is active in the United States, in Canada as well as internationally. During the financial year ended June 30, 2015, 51.4% of the Corporation's sales were recorded in the United States, 35.5% were in Canada and 13.1% were elsewhere. During the previous financial year, ended June 30, 2014, the Corporation recorded 51.5% of its sales in the United States, 35.6% in Canada, and 12.9% elsewhere.

H₂O Innovation's products and services are sold in the municipal, commercial and industrial water treatment markets. In these markets, the Corporation mainly serves: municipalities and local governments; communities and private developments; energy and power plants; oil and gas; mining and workers camps, and other industrial segments.

The Corporation's products and services are mainly sold directly to its customers by its internal sales force in the domestic market (Canada and USA). Customers can mainly be categorized in two broad categories: consulting engineering firms, construction companies and engineering procurement companies on one hand and end-users on the other hand. End-users include industrial and manufacturing companies, commercial clients, water utilities, municipalities and local governments.

The Corporation also uses a network of more than 15 external sales representatives to sell its wastewater treatment equipment and systems in Canada and the United States.

For its specialty chemicals, the Corporation has developed a distribution network of 28 international distributors covering the following countries: China, South Korea, Thailand, Australia, Taiwan, Columbia, Brazil, Malaysia, Philippines, Mexico, India, United Arab Emirates, Egypt, Tunisia, Pakistan, Israel, Jordan, South Africa, Ethiopia, Tanzania, Kenya, Germany and Switzerland. All these distributors market and sell the Corporation's PWT™ line of specialty solutions for membrane pre-treatment, cleaning and maintenance that are part of its specialty products and services business. Products sold locally by these international distributors are manufactured by the Corporation at its Vista, CA facility and shipped to distributors.

Since the acquisition of Piedmont, the Corporation maintains a distribution network of nearly 10 distributors who are active in many regions and countries around the world, such as Spain, Mexico, United Arab Emirates, Saudi Arabia, Australia, Korea, Egypt and Israel. All these distributors market and sell Piedmont's couplings and fittings that are part of the specialty products and services business of H₂O Innovation. The Corporation also uses its internal sales force to sell such products with potential customers. Couplings and fittings sold by these international distributors or by H₂O Innovation's sales force are manufactured by suppliers who have been carefully selected and who have developed a strong business relationship with Piedmont over the years.

Concerning the maple syrup industry, the Corporation has developed a distribution network of more than 35 distributors who are active in Canada (Québec, Ontario and New-Brunswick) as well as in the North-East of the United States. All these distributors market and sell Corporation's maple syrup equipment throughout maple farms and other producers of maple syrup. H₂O Innovation also uses its internal sales force to sell maple syrup equipment with potential customers. Corporation's maple syrup equipment is manufactured at its Ham-Nord, Quebec facility and shipped to distributors and customers.

For the financial year ended June 30, 2015, the Corporation derived more than ten percent (10%) of its revenues from a single external customer. For the financial year ended June 30, 2014, no customer accounted for more than ten percent (10%) of its revenues.

The Corporation does not deem to be exposed to major seasonality risks for its sales, except for the maple syrup industry which is a seasonal industry. The Corporation finds itself mildly exposed to economic cycles, as many other companies doing business in the field of infrastructure and utilities. In order to minimise the effects of these economical cycle, the Corporation has balanced its activities between municipal, commercial and industrial markets, and a sound business mix combining systems sales to sales of specialty products and services – which are generally recurring in nature. This business mix, which is a result of the acquisitions completed by the Corporation over the last few years, along with its organic growth over the same period, should enable the Corporation to manage its exposure to economic cycles.

The Corporation works with a diverse network of suppliers located mainly in Canada and in the United States and is not dependent on a single supplier for the supply of any raw material or component. The Corporation frequently monitors its network of suppliers, their technical capabilities and the competitiveness of their pricing and sales conditions. The Corporation also works with new suppliers on an ad hoc basis throughout the year according to each project's specific manufacturing requirements.

4.5 Strategic orientation

The business model of the Corporation relies on two (2) strong pillars. The first one, being the core of the Corporation's development and growth, is focused on delivering membrane filtration systems and solutions for municipal and industrial customers mostly in Canada and in the United States. The second portion on the business model relies on specialty products and services.

The Corporation intends to continue to leverage its water treatment systems customer base to generate sales of specialty products and services, including specialty chemicals, couplings, fittings and maple syrup equipment. Such sales are generally recurring and thereby bring additional predictability to its business model. The Corporation's close and on-going relations with its customers of specialty products and services have also brought additional opportunities to sell systems. The synergies between the Corporation's two areas of activity are efficient and the Corporation wishes to maintain and increase these synergies during the financial year 2016. Furthermore, with the commercialization of the SPMC™ software and the start-up of its new venture in the leasing and the operating and maintenance of water treatment systems, the Corporation improves notably its offer to its customer and position itself as a complete membrane filtration solution provider, able to provide them with the complete spectrum of systems, equipment and consumables, while also supporting them in the operation and maintenance of their systems, seeking to continuously improve operational performance.

The Corporation will also focus on increasing its presence in niche markets, such as energy and power generation, ethanol production, oil and gas, and mining. In the municipal market, in order to increase its sales of water and wastewater systems, the Corporation intends to focus on small and mid-size communities in North America, developing relationships with smaller-sized regional and local engineering firms. These local engineering firms often rely more on knowledgeable and experienced water treatment systems providers to offer their services to their municipal customers, compared to national or international engineering firms, which often have their own internal team of specialized water treatment engineers. In the industrial market, the Corporation will increase its focus on industrial segments with complex water problems, seeking to provide them customized solutions and to optimize the operation of their water treatment systems. The Corporation has also developed, and continues to promote its expertise in small and mid-sized containerized/packaged water and wastewater treatment units.

During the next financial year, the Corporation intends to continue developing its international activities throughout its well-established international distribution network for its specialty products and services business. With the addition of Piedmont within Corporation's group, the Corporation intends to create synergies between all its different distribution networks and to continue expanding such networks worldwide. The Corporation has always as key objective the development of new products in order to fulfill its constantly evolving customers' needs and provide improved support to its distributors, and leverage its hybrid offering of water treatment systems and specialty products and services, cross-selling to customers of its two areas of activity.

The Corporation's development strategy for the financial year 2016 and beyond seeks to make its business model evolve from being mainly a manufacturer of water treatment systems and specialty products to being a complete water treatment customer-focused company. With its hybrid offering, H₂O Innovation develops long-term relationships with its customers and provides them support in the operation and maintenance of their water treatment systems for a continuous improvement of their equipment's performance and efficiency.

As for the maple syrup industry, the Corporation intends to continue to expand its distribution network and maintain its growth through the US market by acquiring a larger part of market. The Corporation will continue to develop innovative products for the maple syrup industry in order to meet the needs of its customers.

4.6 Competition

Part of the Corporation's main competitors in the water treatment industry are large, multinational entities such as General Electric (USA), Veolia (France), Degremont (France), Pall Corporation (USA), Doosan (South Korean) and Evoqua (USA). Locally, the Corporation also competes with regional players such as Harn R.O. Systems in the Southeast of the United States; Wigen Water Technologies in the Midwest of the United States, FilterBox in Western Canada and Mabarex in Quebec, amongst others. For certain specific technologies or in certain niche markets, the Corporation competes with specific players such as Westech for its bioreactor wastewater treatment technologies and Nalco, GE Betz, Genesys, Avista, and King Lee Technologies for its membrane filtration consumables and maintenance solutions technologies. The main competitors of the Corporation in the couplings and fittings industry are Victaulic, Shurjoint (now part of Tyco since 2012), Pass and Horizon.

H₂O Innovation's competitors in the maple syrup industry are not numerous and are the main players in such industry, such as Les Équipements Lapierre, Les Équipements d'érablière CDL, L.S. Bilodeau and Dominion & Grimm. All these Quebec-based companies are also the competitors of the Corporation in other markets than the province of Quebec.

Meanwhile, despite its modest size, H₂O Innovation believes that it is one of the few companies in the water treatment industry in North America to offer such a broad and complete offering with such a significant number of references. In North America, its size enables the Corporation to be competitive in a niche market relatively less occupied by its larger multinational competitors. In normal economic conditions, these larger entities tend to avoid customizing solutions to customers needs and tend to embrace large scopes of work.

5. NARRATIVE DESCRIPTION OF THE BUSINESS

5.1 General business

H₂O Innovation designs, manufactures and assembles water treatment systems. Each project is customized by its multidisciplinary team to meet customers' specific needs.

The Corporation's process engineering experts make sure that the proposed treatment solution will ensure customer's problem resolution. Afterwards, all its specialty groups, such as project management, mechanical and 3D modeling engineering, electric and automation engineering as well as installation and commissioning, will be involved in the execution of each project, always in collaboration with people in charge of the project on customer's side.

H₂O Innovation offers complete technical and maintenance service in order to support customers' system operation on a continuous basis and supply them with all required spare parts, repair and/or change of components. The Corporation expands its offer by offering leasing as well as operating and maintenance of water treatment system through its subsidiary H₂O Operation and Maintenance Inc.

In order to assist its customer with the operation of a water or wastewater treatment system, H₂O Innovation has developed during the last financial year and is now commercializing its SMPC™ software that combines early detection of any issues that may arise, system optimization, remote troubleshooting and accessibility of systems, and common data storage all into one, simple platform.

The specialty products and services business designs and manufactures a unique range of specialty chemicals for membrane treatment under the brand name PWT™. The Corporation develops specific anti-scalants and cleaners for membrane systems. H₂O Innovation operates with a modern laboratory and automated production methods certifying the quality of shipped products from its manufacturing plant in California. The Corporation also offers a membrane autopsy service to help detect intricate problems. This way, the Corporation can easily recommend the required protocols in order to expand membrane useful life.

The Corporation also designs and manufactures a broad line of different couplings and fittings for a wide range of industrial and municipal applications in the water treatment industry, through its subsidiary Piedmont.

5.2 Production methods and specialized expertise

The Corporation believes that it holds competitive advantages over its main competitors as a result of the accumulated knowledge and know-how of its people, its participation in over a thousand water treatment projects, its patented technologies and its scalable manufacturing capacity. The Corporation can offer several different solutions for drinking water production, process water production or wastewater treatment and is also able to service systems in these fields.

The Corporation is specialized in the design of customer tailored systems. In its two production facilities dedicated to manufacturing and assembling water treatment systems, a 65,000 sq. ft. plant located in Ham-Nord (Quebec) and a 30,800 sq. ft. plant located in Champlin (Minnesota), the Corporation benefits from a specialized manpower able to meet customer requirements in short lead-times, thus offering a competitive advantage. Its manpower also has the expertise to manufacture and assemble water treatment systems outside of its manufacturing facilities, for example site-built projects or specific containerized/packaged units.

The Corporation also manufactures, in its 12,000 sq. ft. production facility in Vista (California), its sustainable specialty chemicals for membrane pre-treatment and cleaning applications. In this facility, the Corporation develops anti-scalants and cleaners for membrane systems that maximize the operating efficiency, economy, performance and longevity of reverse osmosis systems. In April 2015, the Corporation increased significantly its production and warehouse capacity in Vista (CA), by around 60%, by renting a new warehouse of 7,640 sq. ft. adjacent to its existing facility.

H₂O Innovation can offer partial or complete systems and services packages to its customers, from the pilot plant to the design, assembly, installation and customer after-sales service which includes providing cleaning solutions for membranes systems treatment and membrane forensics services for the inspection of membrane elements.

The Corporation also offers various types of mobile units for water purification and/or wastewater treatment. These mobile units, developed for permanent, emergency or piloting use, are true modular treatment plants. Custom-built to meet the specific needs of treatment and the capacities required, they are assembled inside containers, caravans or trailers (insulated, heated and ventilated, if necessary). With its new containerized membrane bioreactor, the Corporation will offer to its customers an advanced wastewater treatment solution that can meet typical wastewater effluent regulations throughout North America. This containerized membrane bioreactor is the far most compact and versatile containerized wastewater treatment package on the market to offer treatment redundancy usually found only in much larger plants.

The Corporation designs couplings and fittings made from polymers, stainless steel and duplex stainless steel. The housings of such products are made from molds owned by the Corporation. The various materials are injected in the molds under strict quality control to minimize any manufacturing defects. Once the housings are completed and confirmed compliant with the specifications, the other components of hardware (gaskets, nuts and bolts) are installed to complete the couplings assembly. In addition to such components, customers are provided with detailed installation and instruction manuals and can also benefit from the Corporation's technical services.

5.3 Employees

As of June 30, 2015, the Corporation had 165 employees in Canada and the United States including more than 30 engineers specialized in innovative water treatment technologies, such as membrane filtration, membrane biological reactors and membrane cleaning solutions, in software development and in controls and programming.

5.4 Risks and uncertainties

The following risks and uncertainties relating to the Corporation are not comprehensive; the Corporation operates in a constantly evolving sector, which can cause new risks and uncertainties to arise. The Corporation is not in position to neither predict these risks and uncertainties, nor evaluate their impact, as the case may be, on its activities, nor to evaluate to what extent may a factor, or a combination of factors, cause actual results to differ from those presented in the forward-looking statements. Therefore, the Corporation's shareholders should not unduly rely on these forward-looking statements.

Currency risk

The Corporation is exposed to exchange risk as a result of its U.S. dollar purchases and sales. To limit the impact of fluctuations of the Canadian dollar over the U.S. dollar and other currencies, the Corporation matches, in general and when possible, the cash receipts in a foreign currency with the cash disbursements in the same foreign currency. The Corporation does not use derivative financial instruments to cover the variability of cash flows in foreign currencies.

Cash flow and fair value interest rate risk

In the normal course of business, the Corporation is exposed to interest rate fluctuation risk as a result of the floating-rate loans, debts receivable and loans payable. The Corporation manages its interest rate fluctuation exposure by allocating its financial debt between fixed and floating-rate instruments.

The guaranteed deposit certificates and unsecured loans bear interest at fixed rates and the Corporation is, therefore, not exposed to the risk of changes in fair value resulting from interest rate fluctuations.

The bank loans bear interest at floating rates and the Corporation is, therefore, exposed to the cash flow risks resulting from interest rate fluctuations.

Credit risk

Credit risk relates to the risk that a party to a financial instrument will not fulfil some or all of its obligations, thereby causing the Company to sustain a financial loss. The main risk relates to accounts receivable. To manage credit risk from accounts receivable, the Company reviews credit limits, monitors aging of accounts receivable and establishes an allowance for doubtful accounts based on specific customer information and general historical trends.

Liquidity Risk

Liquidity risk is the risk that the Corporation will be unable to fulfill its obligations on a timely basis or at reasonable cost. The Corporation manages its liquidity risk by monitoring its operating requirements and using various funding sources to ensure its financial flexibility. The Corporation prepares budgets and cash forecasts to ensure that it has sufficient funds to fulfill its obligations. For its investing activities, the Corporation will evaluate its liquidity needs when applicable and take the necessary action.

Competitive environment

In the markets targeted by the Corporation, competition is based on a number of factors, especially price, technology, application know-how, financing viability, corporate image, product warranty, reliability, distribution network, and after-sale service. Some competitors of the Corporation have the benefit of relying on larger resources, notably financial, than those of the Corporation. In the past, the Corporation noticed that challenging global financial conditions contributed to reduce the number of water treatment projects and increase the competition as well as the number of companies bidding on each project. If such competitive environment persists, profit margins on projects may be lowered and it may adversely affect the Corporation's business, financial situation and results of operations.

Operating risks

Design and fabrication of water treatment projects involve a high degree of operating risks. Human error in design and fabrication can cause material damage or delays in delivery. The occurrence of any of these events could result in loss of revenues, increased costs and liability to third parties. The Corporation uses software that has improved the design, drafting, estimation and fabrication of its products to minimize human error. The Corporation also controls production quality in its plants and is protected by a general insurance coverage.

Fixed Price Contracts

The Corporation typically enters into fixed price manufacturing contracts based upon estimates of technical risks and total production costs. Such estimates, if materially inaccurate, can result in potential losses related to fulfilling the contractual obligations of the Corporation.

Capacity to secure performance guarantees

In the industry in which the Corporation evolves, it is important for the Corporation to be able to provide required performance guarantees such as bonds or insurance coverages in order to bid for and obtain certain contracts. The capacity of the Corporation to secure performance guarantees depend among other factors on its financial situation and on the collateral guarantees that the Corporation is able to provide to a bonding company. The financial situation of the Corporation and its capacity to provide collateral guarantees can be affected by many different factors and there is no assurance that the Corporation will always be able to provide the required performance guarantees for any project. If required performance guarantees cannot be provided and the Corporation cannot enter into an agreement with a customer, the Corporation may not be able to execute a project for which it had all required technical skills and competitive pricing.

Management and employees

The Corporation depends on the skills and experience of its management team and other key employees. The Corporation relies heavily on its ability to attract and retain highly-skilled personnel in a competitive environment. The Corporation may be unable to recruit, retain, and motivate highly-skilled employees in order to assist the Corporation's business, especially sales activities that are essential to the success of the Corporation. Failure to recruit and retain highly-skilled employees may adversely affect the Corporation's business, financial condition and results of operations.

Capital investment

The business of the Corporation depends in part upon capital investment of its customers. In many cases such capital expenditures are substantial in relation to a customer operating budget. The technologies of the Corporation frequently represent a new solution to a customer's water treatment problems, leading to a need to educate the customer about the solutions of the Corporation. As a result, a significant proportion of the Corporation's business is made up of orders that are large in relation to total revenues and subject to a sale cycle which may exceed one year as well as to deferment and cancellation.

Current Global Financial Conditions

The Corporation offers products and services that are primarily designed for the non-residential construction market. Non-residential construction includes municipal, industrial, commercial and institutional sectors. Activity in the non-residential construction market is closely tied to overall changes in the economy. Economic growth and cycles have a direct impact on the level of construction that takes place on an annual basis. The economic recovery, which follows one of the worst economic and financial crisis, still remains fragile. The Corporation believes that the water industry has a long-term sustained growth curve. During the financial year ended June 30, 2015, investments in water treatment systems have considerably increased; but on a short term basis such growth may be uneven due to the current instability of the global markets.

In addition, the current challenging global financial conditions have been characterized by increased volatility. The difficulties met by financial institutions have contributed to a reduction in liquidity among all financial institutions and have reduced the availability of credit to those institutions and to the issuers who borrow from them. These factors may impact the ability of the Corporation to obtain equity or debt financing on terms favourable to the Corporation. As such, continued increased levels of volatility and market turmoil may impact the Corporation's operations and adversely affect the price of the common shares of the Corporation.

Implementation of a strategic plan

The commercial strategy of the Corporation aims at leveraging its hybrid offering of projects and consumables, focusing on the development of niche sectors and concluding acquisitions or alliances with players in strategic geographical regions, strong complimentary product lines or business models. The strategic plan of the Corporation should be considered under risks perspective, expenses and difficulties frequently encountered by a developing business. The successful viability of the Corporation's growth strategy may require capital investments larger than those previously expected and nothing warrants that the Corporation will achieve the desired growth level.

Product Liability and Other Lawsuits

The Corporation is subject to a variety of potential product liabilities claims and other lawsuits related with its operations, including liabilities and expenses associated with product defects. The Corporation maintains product liability and other insurance coverage that management of the Corporation believes is generally in accordance with the market practice in its industry, but there can be no assurance that the Corporation will always be adequately insured against all such potential liabilities.

Additional financing and dilution

The Corporation does not exclude raising additional funds by equity financing. In addition, 331,500 stock options are currently issued and outstanding¹.

The exercise of stock options, as well as any new equity financings, represent dilution factors for present and future shareholders.

Market Liquidity

Trading on the Corporation's common shares is unstable, which could in same period result in a lack of liquidity for those shares. The market price for the common shares of the Corporation could consequently be subject to wide fluctuations. Factors such as the announcement of significant contracts, technological innovations, new commercial products, patents, a change in regulations, quarterly financial results, future sales of common shares by the Corporation or current shareholders, and many other factors could have considerable repercussions on the price of the Corporation's common shares. In addition, the financial markets may experience significant price and value fluctuations that affect the market prices of equity securities of companies that sometimes are unrelated to the operating performance of these companies. Broad market fluctuations, as well as economic conditions generally may adversely affect the market price of the Corporation's common shares.

Shortage of Raw Materials

Some of the products manufactured by the Corporation require specialized raw materials. If such raw material is not available or not available under satisfactory terms and the Corporation cannot manufacture and provide its customers with the requested product, sales level and relationships of the Corporation with its customers can be negatively affected.

Development of New Products

From time to time, the Corporation develops new products of a specialized nature that have inherent risks, namely that either the product does not perform as desired or unacceptable reliability issues render the new product unmerchantable; or supplier risk that required components procured from third party vendors do not perform in an acceptable manner, thereby having an adverse impact on marketability of such new products and on the Corporation's product liability.

Acquisition and Expansion Risk

The Corporation may expand its operations, depending on certain conditions, by acquiring additional businesses, products or technologies. There can be no assurance that the Corporation will be able to identify, acquire or profitably manage additional businesses, or successfully integrate any acquired business, products, or technologies into the business without substantial expenses, delays or other operational or financial difficulties. There can be no assurance that acquired businesses, products or technologies, if any, will achieve anticipated revenues and income.

In connection with acquisitions completed by the Corporation, there may be liabilities and contingencies, which the Corporation failed to discover or was unable to quantify in its due diligence, which it conducted prior to the execution of the acquisition, and the Corporation may not be indemnified for some or all of these liabilities and contingencies. The existence of any material liabilities or contingencies could have a material adverse effect on the Corporation's business, financial condition and results of operations. Furthermore, acquisitions may involve a number of special risks including diversion of management's attention, failure to retain key personnel and unanticipated events or circumstances, some or all of which could have a material adverse effect on the Corporation's performance.

The failure of the Corporation to manage its acquisition or expansion strategy successfully could have a material adverse effect on the Corporation's results of operations and financial condition.

Technology and regulatory changes

The water treatment industry is characterized by evolving technologies, competition imposed standards and regulatory requirements which have an impact on the demand and compel the Corporation to improve its products and services. The evolution of legal, regulatory or local requirements may render obsolete some products and some water treatment processes offered by the Corporation. The acceptance of new products may also be negatively impacted by the enforcement of new governmental legislation imposing more stringent standards.

The Corporation is also subject to risks associated with the introduction of new products and applications, especially the non-acceptance on the markets, a delay in the development or a malfunction of the products.

¹ Adjusted to reflect the December 1st, 2014 five-to-one share consolidation.

6. DESCRIPTION OF THE SHARE CAPITAL

The authorized share capital of the Corporation consists of an unlimited number of common shares and an unlimited number of preferred shares, issuable in series.

As of September 22, 2015, 20,926,551 common shares are issued and outstanding.

The following is a brief summary of the attributes of the common shares and the preferred shares. This summary is subject to the more detailed provisions set out in the articles of the Corporation.

6.1 General description

6.1.1 Common shares

The holders of common shares have the right to vote at all meetings of shareholders, with the exception of those meetings at which only the holders of other classes of shares have voting rights. The holders of common shares are entitled to receive and to be paid in money, in shares or in property of the Corporation, out of the monies of the Corporation applicable to the declaration and the payment of dividends, any amount of declared dividend, when and as declared by the Board of Directors of the Corporation. The holders of common shares are entitled to receive the remaining assets of the Corporation upon its liquidation, dissolution, winding-up of the Corporation or any other distribution of its asset.

6.1.2 Preferred shares

Preferred shares may be issued at any time, in one or several series, ranking between themselves, as shares of this specific category upon payment of dividends and assets distribution in the case of Corporation winding-up, liquidation and partial or complete asset distribution among the shareholders. Subject to the provisions of the *Canada Business Corporation Act*, preferred shares do not entitle their holder to vote, to be convened to or to attend shareholders' meetings. The holders of preferred shares of a specific series are entitled to receive, with respect to each financial year or any other period indicated on the articles of amendment related to said series, preferential dividends. The cumulative or non-cumulative characteristic, rate, amount or calculation method and payment terms of the said preferential dividends will be determined by the applicable articles of amendment. In the event of winding-up of the Corporation, the distribution of its assets in the liquidation process, in whole or in part among shareholders, the holders of preferred shares of any series receive, in cash or in nature, an amount equivalent to the counterpart payable to said issued and outstanding shares, in priority before any distribution to the holders of common shares.

7. DIVIDENDS

The Corporation has not declared any dividend on its common shares since its incorporation and intends to continue reinvesting its future benefits to support its growth.

8. MARKET FOR SECURITIES

8.1 Trading Price and Volume

The common shares of the Corporation are listed on the TSX Venture Exchange Inc. under the symbol "HEO" and on the NYSE Euronext Alternext Exchange in Paris under the symbol "ALHEO".

The following sets out trading information for each month during the financial year ended June 30, 2015 for the Corporation's publicly traded common shares listed on the TSX Venture Exchange, as well as corresponding monthly volume:

Month	Closing High	Closing Low	Volume
July 2014	\$0.37	\$0.31	1,094,901
August 2014	\$0.35	\$0.315	441,391
September 2014	\$0.35	\$0.30	592,609
October 2014	\$0.38	\$0.29	1,357,603
November 2014	\$0.365	\$0.32	675,144
December 2014 ¹	\$1.84	\$1.42	121,083
January 2015	\$1.49	\$1.36	150,317
February 2015	\$1.51	\$1.30	392,641
March 2015	\$1.44	\$1.30	166,964
April 2015	\$1.32	\$1.22	140,004
May 2015	\$1.53	\$1.29	674,164
June 2015	\$1.88	\$1.48	898,837

¹ On December 1st, 2014, the Company completed a consolidation of its issued and outstanding common shares on a five-to-one basis.

The following sets out trading information for each month during the financial year ended June 30, 2015 for the Corporation's publicly traded common shares listed on the NYSE Euronext Alternext Exchange in Paris, France, as well as corresponding monthly volume:

Month	Closing High	Closing Low	Volume
July 2014	€0.22	€0.21	37,864
August 2014	€0.22	€0.20	2,025
September 2014	€0.23	€0.20	33,500
October 2014	€0.24	€0.20	6,666

Jean-Réal Poirier ⁽²⁾⁽³⁾ St-Georges, Quebec Canada	Corporate Director (former Vice President, Manufacturing Operations for Canam Group Inc.)	Director	November 12, 2013	---	---

⁽¹⁾ Member of the Audit Committee.

⁽²⁾ Member of the Governance, Remuneration and Risks Committee

⁽³⁾ Member of the Technology and Projects Committee

⁽⁴⁾ Information provided by each director

Directors are elected on an annual basis by the shareholders. Each director holds office until its successor has been elected, or unless the director resigns or if his or her position becomes vacant by reason of death, dismissal or any other reason.

For the past five (5) years, all the directors of the Corporation held the principal occupation indicated besides their name, with the following exceptions:

- Jean-Réal Poirier has retired in March 2013 from his position of Vice President Manufacturing Operations for Canam Group Inc. M. Poirier held various positions with Canam Manac Group for the last 25 years.

As a group, the directors of the Corporation held, as of September 22, 2015, 2,999,090 common shares of the Corporation, representing 14.33 % of the issued and outstanding common shares of the Corporation.

9.2 Executive Officers

Following are the names and city of residence of the executive officers of the Corporation, their principal occupation, the starting date of their function as executive officer and the number of voting shares of the Corporation held directly or on which they had control on, as of June 30, 2015 and as of September 22, 2015:

Name and Place of Residence	Position within the Corporation	With the Corporation Since	Number of Shares as of June 30, 2015 ⁽¹⁾	Number of Shares as of September 22, 2015 ⁽¹⁾
Marc Blanchet Quebec City, Quebec, Canada	Vice President, Corporate Affairs and Secretary	February 27, 2007	71,907	73,912
Guillaume Clairet Quebec City, Quebec Canada	Executive Vice President	November 29, 2004	70,926	73,706

Frédéric Dugré Quebec City, Quebec Canada	President and Chief Executive Officer	January 12, 1999	167,393	171,402
Josée Riverin Quebec City, Quebec Canada	Vice President, Finance	November 1, 2010	32,048	32,048

⁽¹⁾ Information provided by each officer.

For the past five (5) years, all the executive officers of the Corporation held the principal occupation indicated besides their name, with the following exceptions:

- Josée Riverin has been serving as Director of Finance of H₂O Innovation since February 9, 2011, and her title changed for Vice President, Finance as of July 1, 2012. Chartered accountant with over 15 years of experience, Ms. Riverin came to H₂O Innovation on November 1, 2010 as Corporate Controller after holding positions as Director of Financial Reporting at Cossette Inc., from July 2003 until October 2010; and previous to that she was Principal Manager at PricewaterhouseCoopers.
- Guillaume Claret was appointed Executive Vice President of H₂O Innovation as of July 1, 2012. Over the last five years, Guillaume Claret served in sequence as National Sales Manager, Director of Business Development and Vice President of Strategic Business Development. Guillaume Claret is a registered Professional Engineer in the Province of Quebec, Canada and holds an MBA from the University of San Diego, California.

As a group, the executive officers of the Corporation held, as of September 22, 2015, 351,068 common shares of the Corporation, representing 1.67 % of the issued and outstanding common shares of the Corporation.

9.3 Cease trade orders, bankruptcies, penalties or sanctions

No director, officer of the Corporation or major shareholder of the Corporation whom may affect significantly the control of the Corporation, is or has been, during the ten (10) years preceding the date of this Annual Information Form, a director or executive officer, including a chief executive officer or chief financial officer of a company that: i) while exercising this function, was subject to a cease trade order or order similar to a cease trade order or an order that denied the relevant company access to any exemption under Canadian securities legislation for a period of more than 30 consecutive days, ii) was the subject to a cease trade order or order similar to a cease trade order or an order that denied the relevant company access to any exemption under Canadian securities legislation for a period of more than 30 consecutive days issued after the director or executive officer ceased to be a director or executive officer and which resulted from an event that occurred while that person was acting in such capacity, iii), while that person was a director or executive officer or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets, or iv) became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or became subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets.

Moreover, no officer or director of the Corporation and principal shareholder of the Corporation who may affect significantly the control of the Corporation has been subject to any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority nor any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable investor in making an investment decision.

10. LEGAL PROCEEDINGS AND REGULATORY ACTIONS

Subject to certain proceedings in the normal course of business, the Corporation is not party to any proceedings which would have a material adverse effect, individually or as a whole, on the business, financial situation or operating results. During the financial year ended June 30, 2015, the Corporation has not been subject to any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or that would likely be considered important to a reasonable investor in making an investment decision. The Corporation has not entered into any settlement agreement before a court relating to securities legislation or with a securities regulatory authority.

11. INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

Over the past three (3) financial years, no director and executive officer of the Corporation as well as any person that beneficially owns, or controls or directs, directly or indirectly, more than ten percent (10%) of any class or series of the issued and outstanding voting securities of the Corporation, or any of their associates or affiliates, was part of a transaction that has materially affected the Corporation, except the following:

Financial year ended June 30, 2014:

- On December 5, 2013, some insiders of the Corporation (Caisse de dépôt et de placement du Québec, Richard A. Hoel, Philippe Gervais, Pierre Côté, Éleine C. Phénix, Marc Blanchet, Josée Riverin, Guillaume Clairet and Frédéric Dugré) participated, as the case may be, in the bought deal private placement or the concurrent additional non-brokered private placement and subscribed for an aggregate of 3,941,737 common shares of the Corporation.
- On December 5, 2013, Investissement Québec participated in the bought deal private placement by acquiring 18.28% of the issued and outstanding common shares of the Corporation.
- On September 30, 2013, some insiders of the Corporation (Richard A. Hoel, Laurence E. Gamst and Frédéric Dugré) participated in the non-brokered private placement and subscribed for an aggregate of 1,204,546 common shares of the Corporation.

12. TRANSFER AGENTS AND REGISTRARS

Since June 1, 2014, the Canadian transfer agent and registrar of the Corporation is CST Trust Company, which holds the register of transaction of the common shares of the Corporation in its offices located in Montreal, Province of Quebec.

The European transfer agent and registrar of the Corporation is Société Générale Securities Services (France) which holds the register of transaction of the common shares of the Corporation in its offices located in Paris, France.

13. MATERIAL CONTRACTS

All contracts entered into and closed by the Corporation during the last financial year are considered as entered into during the normal course of business and are not considered “material contracts” for the purpose of *Regulation 51-102 respecting Continuous Disclosure Obligations*.

14. INTERESTS OF EXPERTS

During the financial year ended June 30, 2015, the auditor of the Corporation was Deloitte LLP, Chartered Professional Accountants at their Quebec City office. The auditor is independent in accordance with the rules of the Code of Ethics of Chartered Professional Accountants of Quebec.

15. AUDIT COMMITTEE

15.1 General

The Audit Committee of the Board of Directors is comprised of four independent directors and is responsible for reporting on certain aspects of the governance of the Corporation as delegated by the Board of Directors.

15.2 Mandate of the Audit Committee

The Mandate of the Audit Committee is attached as Schedule “A” to this Annual Information form.

15.3 Composition

The members of the Audit Committee are:

Mrs. Éleine C. Phénix (Chairperson)
Mr. Laurence E. Gamst
Mr. Philippe Gervais
Mr. Richard A. Hoel

Each of these members is independent and financially literate.

Éleine C. Phénix holds a Bachelor of Arts with honour degree from the Collège Jean-de-Brébeuf, a Fellow degree from the Canadian Securities Institute, and an ASC degree (certified corporate director) from the Collège des administrateurs de sociétés. Mrs. Phénix counts over twenty-five (25) years of experience in the Canadian capital market, especially as Senior Vice-President, Underwriting, at Lévesque, Beaubien, Geoffrion Inc. (now National Bank Financial Inc.) and as Senior Vice-President, Capital Development at the Montreal Exchange. Since 1999, Mrs. Phénix is consultant in assets management and

President of Phénix Capital Inc. Mrs Phénix is currently member of four (4) boards of directors, and serves on several audit and governance committees.

Laurence E. Gamst graduated from the University of Minnesota in 1976. He is a Certified Public Accountant and an active member of the American Institute of Certified Public Accountants and Minnesota Society of Certified Public Accountants. In 1976, Mr. Gamst joined DS&B Certified Public Accountants, Consultants & Advisors, where he now acts as Managing Principal. Mr. Gamst uses his vast financial, business ownership and management experience to set and achieve the firm's strategic direction. In addition, he utilizes his business advisory, direct ownership and financial expertise to proactively help clients with strategic planning, operations, succession and financing issues. Mr. Gamst was instrumental in developing DS&B's healthcare specialty, and the firm is now recognized as one of the state's leading healthcare consulting teams. Mr. Gamst is also a private investor and, with partners, invests and acquires privately-owned operating companies.

Philippe Gervais graduated from the University of Montréal in 1988 with a Bachelor of Science in Economics. From 1988 to 1992, he worked for the Minister of National Revenue as Special Assistant responsible for the implementation of the GST. His government service continued with positions as Executive Assistant to the Federal Minister of Public Works and Government Services and then as Political Attaché to the Deputy Premier and President of Treasury Board of Québec. In 1994, Mr. Gervais joined the Capital Hill Group, a government relations firm, as a senior consultant. His vast experience was called upon to modify legislation, strategically positioning issues and assisting in selling goods and services to governments in Canada and abroad.

Richard A. Hoel holds a J.D. from Harvard Law School and a B.A. in Economics from Hamline University. He was a founding partner of Winthrop & Weinstine, a Minneapolis law firm of approximately 85 lawyers. His law practice focused on representing corporate and entrepreneurial customers particularly in the area of buying, restructuring and selling companies. In addition to his law practice, he has been an owner, director and investor in numerous companies in various industries for over twenty years. As part of this process, he has been personally and professionally involved in the business, tax, securities and regulatory issues associated with acquisitions, divestitures and restructurings. He has also been the Vice Chairman and long-time Trustee of Hamline University.

15.4 Fees of the Auditor

During the past two years, the Corporation paid the following fees to its auditor for services rendered:

Fees	Financial year ended June 30, 2015	Financial year ended June 30, 2014
1. Audit fees ⁽¹⁾	\$113,000	\$88,500
2. Audit-related fees ⁽²⁾	\$14,800	\$11,440
3. Tax fees ⁽³⁾	\$67,249	\$59,900
4. All other fees ⁽⁴⁾	\$9,193	\$28,445
Total fees	\$204,242	\$188,285

⁽¹⁾ Audit fees include all fees incurred in respect of audit services, being the professional services rendered by the Corporation's auditor for the audit of the Corporation's annual financial statements and those of the Corporation subsidiaries and the review of the Corporation's quarterly financial statements as well as services normally provided by the Corporation auditor in connection with statutory and regulatory filings and engagements.

⁽²⁾ Audit-related fees include the aggregate fees billed for assurance and related services by the Corporation's auditor that are reasonably related to the performance of the audit or review of the Corporation's financial statements and are not reported under "Audit fees".

⁽³⁾ Tax fees include the aggregate fees billed for professional services rendered by the Corporation's auditor for tax compliance, tax advice, and tax planning.

⁽⁴⁾ All other fees include the aggregate fees billed for products and services rendered by the Corporation's auditor other than the services reported under clauses (1), (2) and (3) above.

15.5 Pre-approval policies and procedures

The mandate of the Audit Committee set out in Schedule A provides that the Audit Committee shall approve the hiring of the auditor. This mandate also prohibits the Corporation to use the auditor to obtain non audit-related services without the pre-approval of the Audit Committee.

15.6 Audit Committee Oversight

Since the commencement of the Corporation's most recently completed financial year, the Audit Committee has not made any recommendations to nominate or compensate an auditor that were not adopted by the Board of Directors of the Corporation.

16. ADDITIONAL INFORMATION

Additional information regarding the Corporation is available on SEDAR at www.sedar.com. Schedule "A": MANDATE OF THE AUDIT COMMITTEE

The Audit Committee of the Board of Directors is composed of a minimum of three outside independent directors and is responsible for reporting on certain aspects of the stewardship of the Corporation as delegated by the Board of Directors. All the members of the Audit committee should possess sufficient knowledge to be able to read and understand the financial statements. At least one of the members of the committee should have « related accounting or finance expertise » for having occupied functions in the accounting or finance sectors, the necessary accounting professional certification or any other comparable experience allowing the acquisition of the professional qualifications and experience, including the occupation of the position of Chief Executive Officer, Financial Officer or officer with financial responsibilities, and be knowledgeable to analyze and understand a complete set of financial statements.

The members of the committee are re-appointed each year by the Board of Directors at the first meeting of the Board of Directors following the Annual General Meeting of the shareholders or at another meeting, if a vacancy occurs. The Board of Directors also appoints a chairman among the designated directors.

The Board of Directors retains plenary authority and power to do all lawful acts and things that are not by law or otherwise directed or required to be exercised or done by the shareholders of the Corporation or in some other manner.

All directors shall act honestly and in good faith with a view to the best interests of the Corporation and exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances.

Definition of Responsibilities

In carrying out its responsibilities, the Audit Committee of the Board of Directors shall have the following specific responsibilities:

1. The oversight of the qualifications and independence of the auditor of the Corporation and approval of the terms and conditions of their audit and non-audit service engagements as required by and in accordance with applicable laws and regulations of the stock exchange and of securities regulatory authorities on which the Corporation lists its securities;
2. Obtain an annual report from the auditor listing all the services and including all related expenses provided to the Corporation, other than those related to the internal audit;
3. The prior approval of any service non-related to the audit and required by the Corporation;
4. Review the competency and adequacy of the accounting personnel to discharge the Corporation responsibility with the necessary regulatory bodies in consultation with the President & CEO, the Vice President, Finance and the auditor;
5. The assessment of the performance of the independent auditor and the filling of any vacancy in the office of the independent auditor between shareholders' meetings;
6. The recommendation of the annual appointment or, if appropriate, the removal, of the independent auditor of the Corporation to the shareholders of the Corporation for their approval in accordance with applicable laws;
7. The Audit committee in consultation with management and the auditor prepare an annual audit plan to determine the work to be done by the auditor and the monitoring of certain aspects of the internal control of the Corporation;
8. The oversight of the reliability and integrity of accounting principles and practices followed by management, financial statements and other financial reporting, and disclosure practices followed by management;
9. Meet privately with the auditor on an annual basis or at any time when deemed necessary to review the results of their finding in their internal audit;
10. The review and recommendation for approval of the annual audited consolidated financial statements of the Corporation and, as required in accordance with applicable laws as well as the approval of the quarterly un-audited consolidated financial statements of the Corporation;
11. Investigate any claims originating from third parties, the income tax departments, etc. and establish their real or potential impact on the results of the Corporation and ensure proper annotations are made to the financial statements;
12. The review and recommendation for approval of prospectuses, annual information forms, annual reports or other applicable forms, as the case may be, including proxy circulars and proxy statements sent to shareholders of the Corporation. The review of management's discussion and analyses of financial condition and results of operations and, any other material disclosure documents as determined by the Board of Directors from time to time;
13. Any other matter as delegated by the Board of Directors, and;
14. Report to the Board of Directors on each and all meetings on a timely and regular basis.

General

In discharging its duties and responsibilities, the Audit Committee is expected to be fully diligent in its oversight to avoid fraud or abuse. Accordingly, the Board of Directors may conduct such examinations, investigations or inquiries, and engage such special legal, accounting or other advisors, at the expense of the Corporation, at such time or times and on such terms and conditions as the Board of Directors considers appropriate.
