

Baker Road MUD

is responsible for all 46 fire hydrants in Windsor Park Lakes. They have been refurbished and painted.

Trivia Question: Why are there three different color tops (Green, White and Yellow) to our fire hydrants?

Answer: The color indicates to the Fire Department what size water line; 10", 8", 6" (i.e. pressure) feeds the hydrant. This allows them to set their pumping pressure on the fire truck to the correct amount.
