

## **Baker Road MUD Tax Dollars at Work!**

Old picture taken above spillway  
drain into Barker Reservoir

Current picture taken from same  
location

The responsibility to clear the drainage channel for Windsor Park Lakes' lakes into Barker Reservoir was given to Baker Road MUD by the Army Corps of Engineers and the Harris County Flood Control District. By clearing the drainage channel this will allow efficient outflow of water from the lakes when they rise above the lakes spillway. This drainage channel is directly behind Tiger Pond and the spillway drainage goes underneath Tiger Pond into Barker Reservoir.
