> 90% of utilities say that adopting digital solutions is a very high priority

(Source: Amane Digital survey 2017)

Focus of digital strategies:

- Prevent issues
- Allow real time event management
- Extend life of assets
- Reduce operating and labor cost

INTRODUCTION

H₂O Innovation has developed a digital solutions using technology to support the **optimization of water treatment plants**. With our unique digital tools, plants can **shift to the next level of comprehension and care**.

Our **Intelogx™ is the key** to engaging customers more closely, improving onsite and remote service support, and extending equipment life. Fully understanding the **health of your system** becomes simple with **Intelogx™**.

Adds a centralized data acquisition system to manage your plant's data.

- All your data logged and securely stored on a central H₂O Innovation server
- Clear status indication of every analog signal on every water system in your plant
- Customizable historical trends, alarm notification via email or SMS and web access to dashboard, trends, and reports
- RO normalization based on industry standard calculations
- Pattern recognition determines the effectiveness of each CEB/CIP and predicts when cleaning will next be required

Remote Access to your HMI

Three simple steps to launching remote access to your HMI:

1. eWon connection
2. VNC server connection
3. Launch application

Ultra-low Power

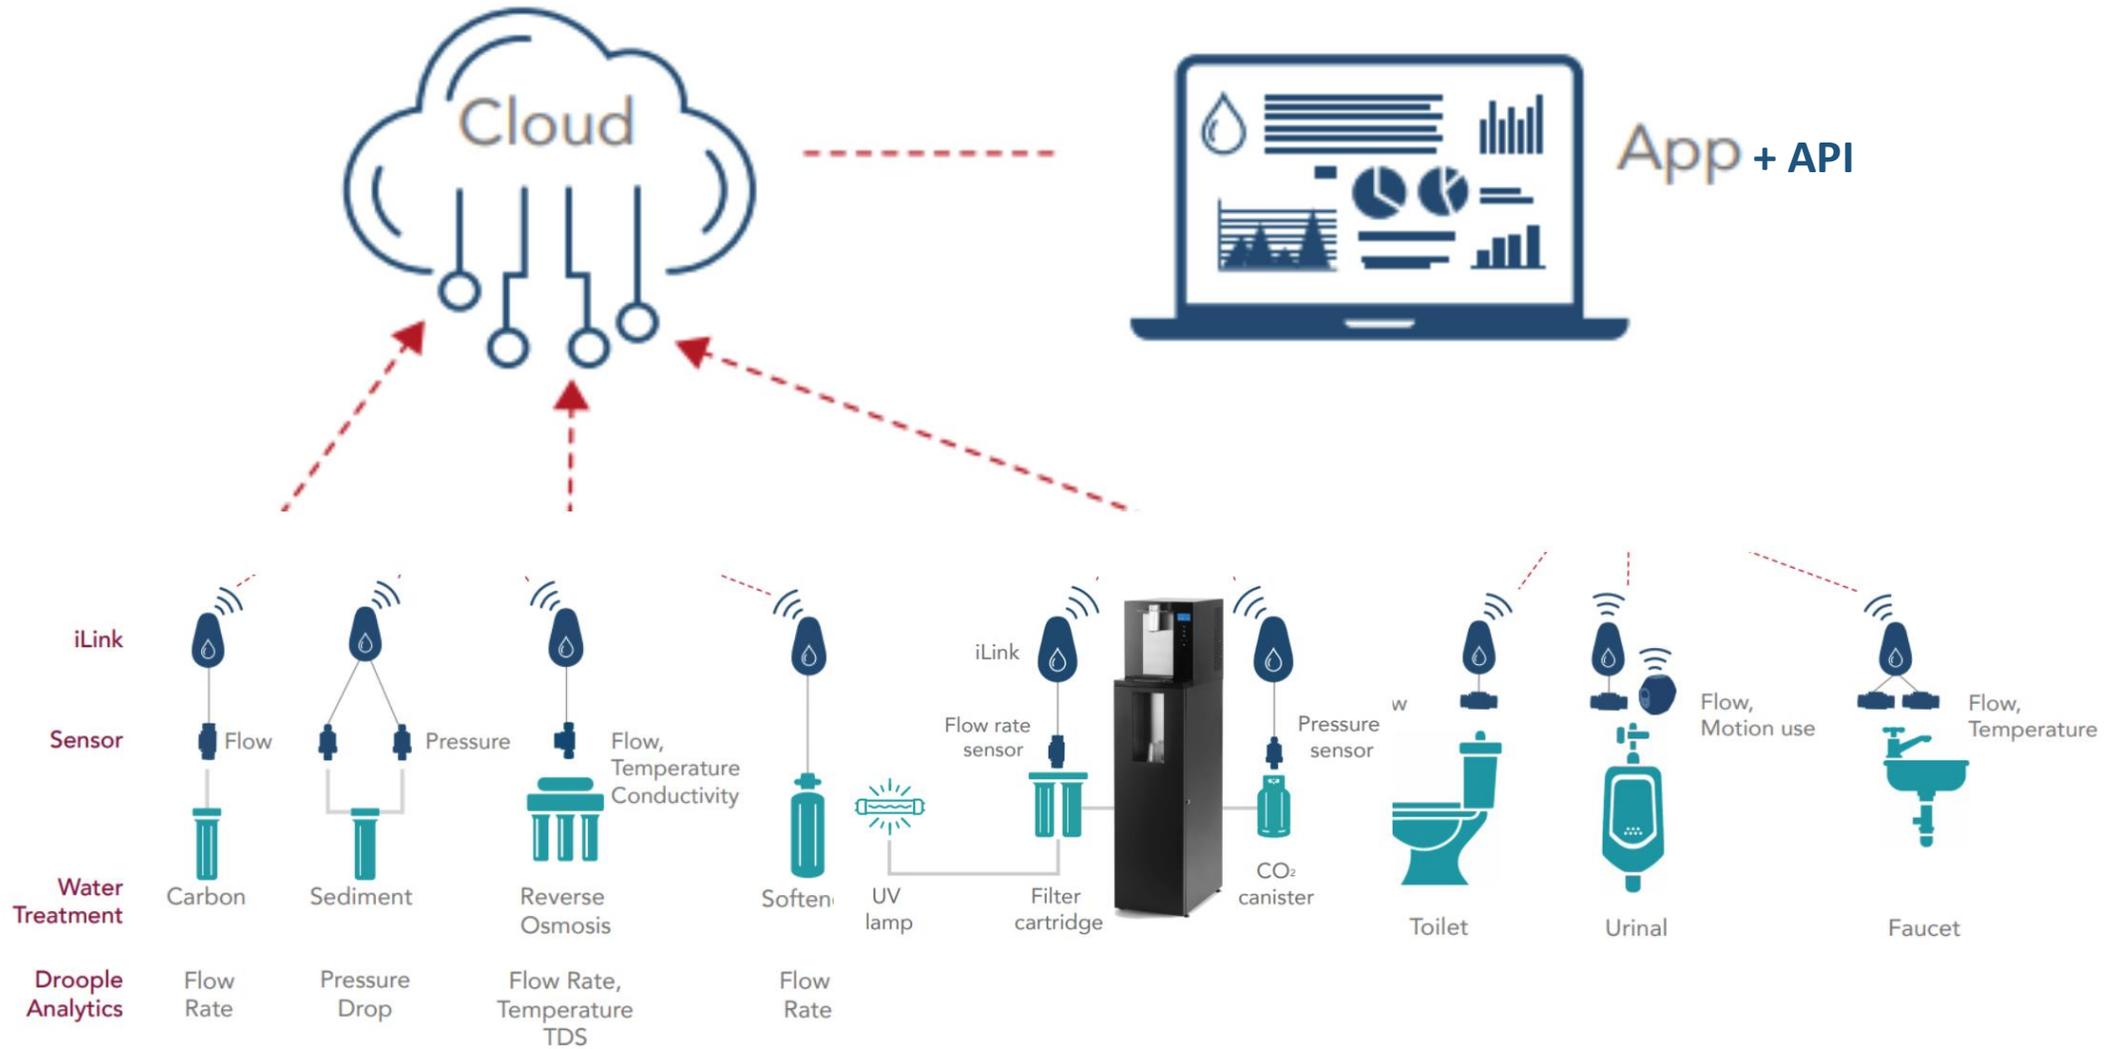

one 3.6V battery only for up to **5-10 years** reducing the **TCO of our solutions**

Embedded Intelligence sends pre-processed data to droople's Platform

LoRaWAN battery operated edge device capable of versatility based on analog/digital reading of sensors. Energy management with ultra-low power grade. Multi-frequency band modulation (US; EU, AS) and edge processing (converting raw sensor data to pre-processed consumption, cycle, delta, variance, etc.). Can connect up-to 4 sensors (2 pressure IN & OUT + 2 TRIO sensor for conductivity delta)

Benefits

- Plug & Play
- Monitor overall water usage
- Refill & Resale consumables
- Planned maintenance

- Identify PoU water patterns thanks to PoE water data with our AI platform

- Plug & Play
- Ensure consistent water quality
- Monitor the clogged filter
- Resale cartridges

- Plug & Play
- Ensure appliance lifetime protection
- Prevent filter overdue
- Resale cartridges

- Plug & Play
- Ensure consistent water quality
- Predict membrane overdue
- Resale cartridges

- Build the first granular map of water hardness thanks to PoU data for a better service and configuration

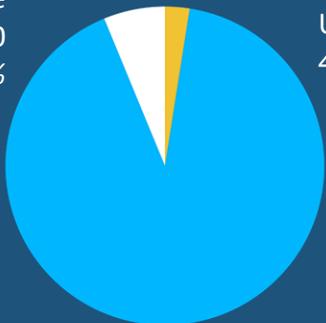

CASE STUDY | ULTRA-FINE FILTRATION

PROJECT: Moving from manual to digital multi-housing ultra-fine filtration management in the light industry.

Fileder Filter Systems provides filters for ultra-fine filtration for a wide range of processes in light industry, life sciences, food & beverage and . However, monitoring the actual performance of customer filtration systems often involves in-person manual pressure measurements, which becomes a major task when servicing a largely distributed fleet.

Maintenance
USD 1200
7%

filtrationOS
USD 800 TCO
4,7%

Multi-housing system
USD 15,000
88,2%

RESULTS:

- ✓ better uptime
- ✓ consistent water quality over the time
- ✓ automated consumable replenishment
- ✓ Less unplanned maintenance

CARWASH PREDICTIVE MAINTENANCE FOR FILTRATION SYSTEMS

PAIN

Pre-filter changed every three days

Maintenance internalized

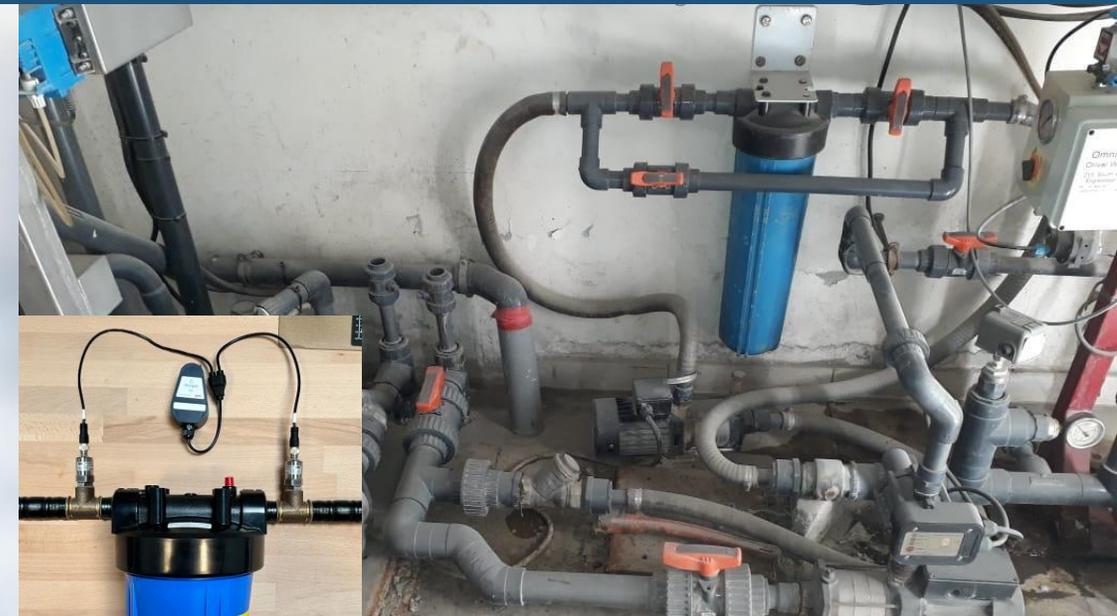

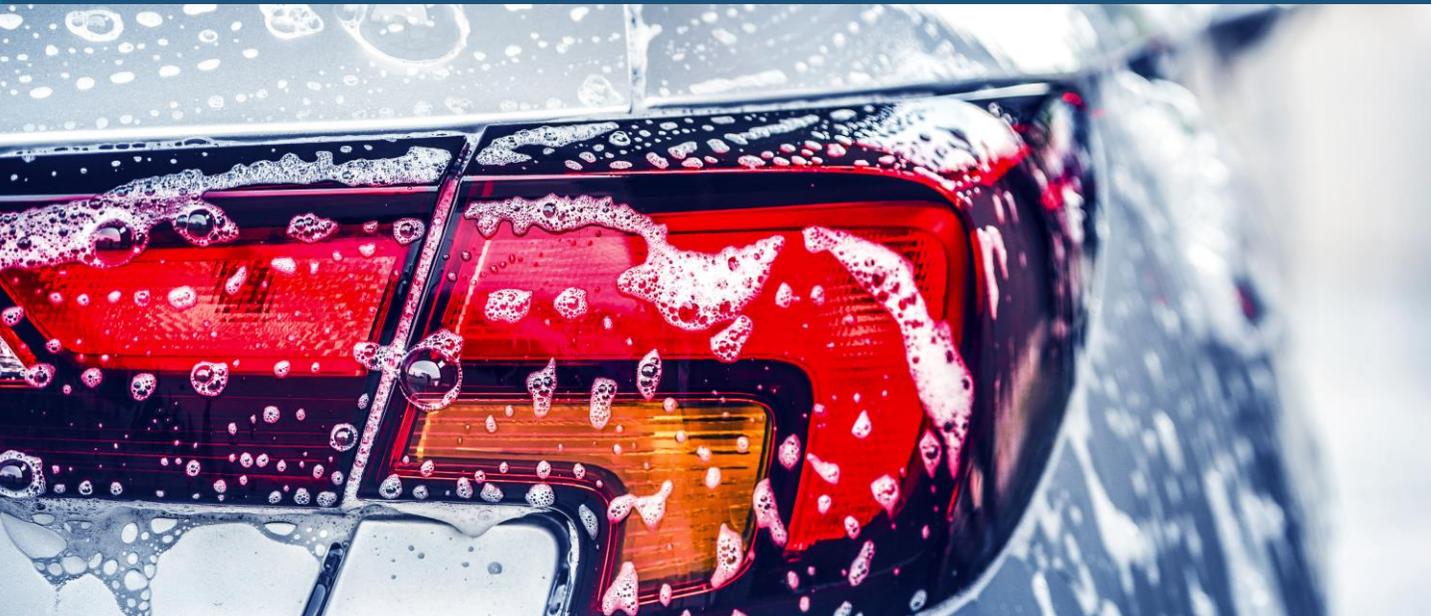

Inefficient filter for oil & sediment

SOLUTION

Best suited quality filtration system for turbidity

Easy system with no backwash

With latest monitoring technology

Droople price list January 2022

CHOOSE YOUR PACKAGE

	One-off purchase ↓ HARDWARE	Monthly or Yearly License ↓ SOFTWARE / DATA	
Flow sensor CARBON	EUR 90	EUR 4 [/month]	EUR 45 [/year]
Retro-fit sensor SOFTENER	EUR 90	EUR 4 [/month]	EUR 45 [/year]
Pressure sensor ULTRA-FINE	EUR 165	EUR 4 [/month]	EUR 45 [/year]
Gateway Hub Wi-Fi	EUR 85	included	Included
Gateway Hub 4G	EUR 185	+ EUR 2 [/month]	+ EUR 24 [/year]
API Platform Integration	Included		

One Hub connects to 50 sensors within a geographical range. If multiple assets are in the same area: equip only one asset with the above package and equip all other assets with only sensor(s) starting at €80.

VOLUME-BASED DISCOUNTS

SOFTWARE – based on active sensors on the platform :

- ❖ Receive discounts based on over 20, 100, 300 and 1000 active assets

HARDWARE – based on volume order :

- ❖ Request prices for orders over 20, 100, 300 and 1000 units
