

COMPANY PROFILE

H₂O Innovation, winner of the prestigious Global Water Intelligence **2020 Water Company of the Year** and **2016 Water Technology Company of the Year**, is a pioneering designer and manufacturer of membrane systems, specializing in water, wastewater, and water reuse treatment for municipal and industrial customers.

The company has an exceptional team of over 1,200 in our facilities in North America, Europe and Latin America.

Our business is built on three pillars: **Water Technologies & Services**, **Specialty Products** and **Operation & Maintenance**.

WATER TECHNOLOGIES & SERVICES

We are renowned membrane process technology specialists, dedicated to providing reliable, custom-engineered solutions. With an installed base of over 800 systems, we have built a dynamic team of experts with unique knowledge of engineering, programming and controls, project management, drafting, commissioning, and field service, all working to deliver the best solutions and experience for our customers.

Through expert implementation of technologies like SCADA and H₂O Innovation's Intelogx™ remote monitoring software, our team can help you optimize system operation, simplify workload, and reduce operating costs.

WATER INFRASTRUCTURE DEVELOPMENT

Through this pillar, we are delivering WaterHubs. They are onsite wastewater treatment and reuse facilities deployed at a wide variety of sites including hospitals, universities, and other commercial & industrial locations that are delivered for no upfront capital cost to customers and operated under long-term contracts, offering reliable water management solutions that minimize risk, maximize financial savings, and enhance environmental stewardship.

TECHNOLOGIES

- Nanofiltration / Reverse Osmosis;
- FiberFlex™ Ultrafiltration/ Microfiltration;
- IFAS / Bio-Wheel;
- SILO™;
- Flexible couplings;
- Cartridge filter housings;
- Filter cartridges;
- Specialty membrane chemicals.

SPECIALTY PRODUCTS

This division of H₂O Innovation is focused on providing world-class chemicals, consumables, and components to the water treatment industry. Scale control is easily managed with our line of diverse scale inhibitors including time-tested phosphonate and phosphonate-polymer blends as well as our unique phosphate-free super-concentrated dendrimer technology. System maintenance is supported by a complete line of cleaning chemicals that includes novel microbubble technology and an enzymatic cleaner designed for heavy foulant removal.

As the first company to manufacture duplex and super-duplex fittings, we are recognized as the industry leader in corrosion resistant grooved couplings. Our line of corrosion-resistant cartridge filter housings includes thoughtful design features that reduce both capital and operating costs, and supply high-quality filter cartridges to meet any requirement.

OPERATION & MAINTENANCE

H₂O Innovation operates and maintains water and wastewater equipment and associated assets for over 650 utilities in Canada and the United States. With a focus on efficiency of operation and regulatory compliance, our O&M staff are specially trained to look after the needs of our industrial and municipal clients.

Close cooperation between our pillars positions us uniquely to provide intelligent engineering, service, and consumable support to our operations customers, and allows our team to improve and simplify future system design based on direct operator feedback.

HIGHLIGHTS

- **Founded in 2000**
- **Over 1,200 employees**
- **One Vision:** through innovation and operational excellence, we empower our team to delight our customers and transform our industry while protecting a vital resource: Water.

H₂O Innovation is an integrated solutions provider for water, wastewater and water reuse treatment from customized designs and technical support to consumables, products, and operation & maintenance.

We help simplify water.
