

With more than 800 installations, H₂O Innovation has acquired a unique expertise in the treatment of wastewater of various origins and quality:

- MBR treatment of municipal and industrial wastewater for superior effluent quality
- Treatment of nitrified and non-nitrified secondary effluents with Ultrafiltration
- RO polishing after conventional or Ultrafiltration pretreatment
- RO polishing after MBR
- Ultrafiltration of Ozone/GAC pretreated effluent for Indirect Potable Reuse
- Treatment with RO for the removal of PFOA and PFAS
- Treatment of industrial wastewater with UF, RO and MBR technologies

Virginia WaterHub | Richmond, VA

With plants in operation for more than a decade, multiple types of membranes used and a vast array of feed water conditions and quality, H₂O Innovation can solve your wastewater problems in:

- Industrial Water Reuse
- Industrial Discharge management and minimization
- Municipal Water Reuse
- Irrigation
- TDS and Chloride Management
- Indirect Potable Reuse
- Emerging Contaminants Removal
